We have seen unprecedented changes in live blood since the roll out of the C19 injections. I have reported extensively on the findings of abnormal structures found in vaccinated blood around the world and now in unvaccinated blood due to the effects of environmental contamination and vaccine shedding. The work of Clifford Carnicom over the past three decades in quantifying changes in human blood related to the synthetic biology called cross domain bacteria (CDB) aka Morgellons is available at [www.carnicominate.org](http://www.carnicominate.org). This appears to involve hydrogel based artificial lifeform that has been sprayed upon humanity via geoengineering projects. I have written about these findings and correlations and reported that Clifford has done chemical analysis suggesting the presence of polyvinyl alcohol hydrogel and extensive metals within these filaments.

To analyze and quantify the objective changes in live blood, Clifford repeated the

experiment of applying a low-level electrical current to unvaccinated blood.

Upon inspection, the blood looked normal, without Rouleaux formation and without the filament structures we have so commonly seen. Please see image above.

Clifford then applied a 10 microamp AC current to the blood sample, in highly dilute blood over a two-hour period. Circle encloses CDB string. The blood sample above changed again unrecognizably to a dense filament network, which were not visible without the application of the low-level electrical current. **Please note, that the microcurrent used was 1000 times less than the current used in the original research on unvaccinated blood in 2022, that has been documented in this 6-paper series.** <https://carnicominate.org/blood-alterations-a-six-part-series/>

*Image courtesy: Unvaccinated blood, extensive filament network seen under 10 micro amp electrical current original mag. approx 1500x*

In comparison, I am including this image, showing the parallel to the C19 injectables:

## La Quinta Columna C19 Pfizer Drop Heated

This is now additional replication of the original work by Clifford, clearly showing that even unvaccinated blood has been apparently contaminated with a synthetic biology on a

sub-micron scale, which can grow under the influence of extremely low-level electrical current. The implications for the dangers of this phenomenon to human health are profound.

In the following post, I will discuss the Infrared Spectroscopy work done by us for chemical analysis on vaccinated and unvaccinated blood showing some surprising findings.

If you would like to support our research to help humanity, please donate to the Carnicom Institute to fund our need for scientific research equipment. Your generosity is much appreciated. <https://carnicominate.org/donations-paypal/>

I found out I was Morgellons positive in 2014. It took a while but I made peace with it. By going alkaline and taking anti-parasitics - I was able to reduce the level of contamination to the point where my body still operated well.

But these injected people... and whatever is being sprayed now in the chemtrails - is really messing me up. IF someone has gotten the whole cocktail or been heavily contaminated - I cannot be around them without my musculoskeletal system degradation. It has happened over

cannot be around them without my musculoskeletal system degradation. It has happened over 5 times now, so denial is a luxury I can't afford. Watching "Died Suddenly" and Dr. Ana's work on un-injected contamination sealed the deal.

One of my friends says it is the frequency the injected are radiating that harms me. It's too late now for me to want to get near anyone who's injected with my EMR meter to find out. I'm done. When my turn comes to sue and get all litigious, I am going to do so on the basis of being denied free association with my fellow citizens.

This may sound crazy, but I love everyone on some level and I adore chatting with strangers - so this is a real hardship for me and I'm really pissed about it.

I have been forwarding your articles on shedding to my unvaxxed friends who have expressed their concern. Thank you for your research.
