

Vax death count = COVID death count according to latest Rasmussen Reports poll

This is the most important poll they've ever done. Mainstream media will NEVER commission a poll like this. NEVER. So when they say the poll must be wrong, ask to see THEIR poll.

Executive summary

Why did the CDC never poll Americans as a “reality check” to make sure they got it right?

I’ve known the answer to that for a long time since I did polls of an unbiased audience long ago back on [July 4, 2022](#). But of course nobody paid attention since I’m a “misinformation spreader.”

But now Rasmussen comes out with the most important poll they’ve ever done and the results are devastating.

You can watch it on YouTube and share with your friends.

The only question left is how long will it take YouTube to remove the video and ban Rasmussen forever?

The announcement

...

Reader Note: As we've done with all of our vaccine side-effects work, this one is fully open - Story, Toplines & Crosstabs - as a public service.

E pluribus unum

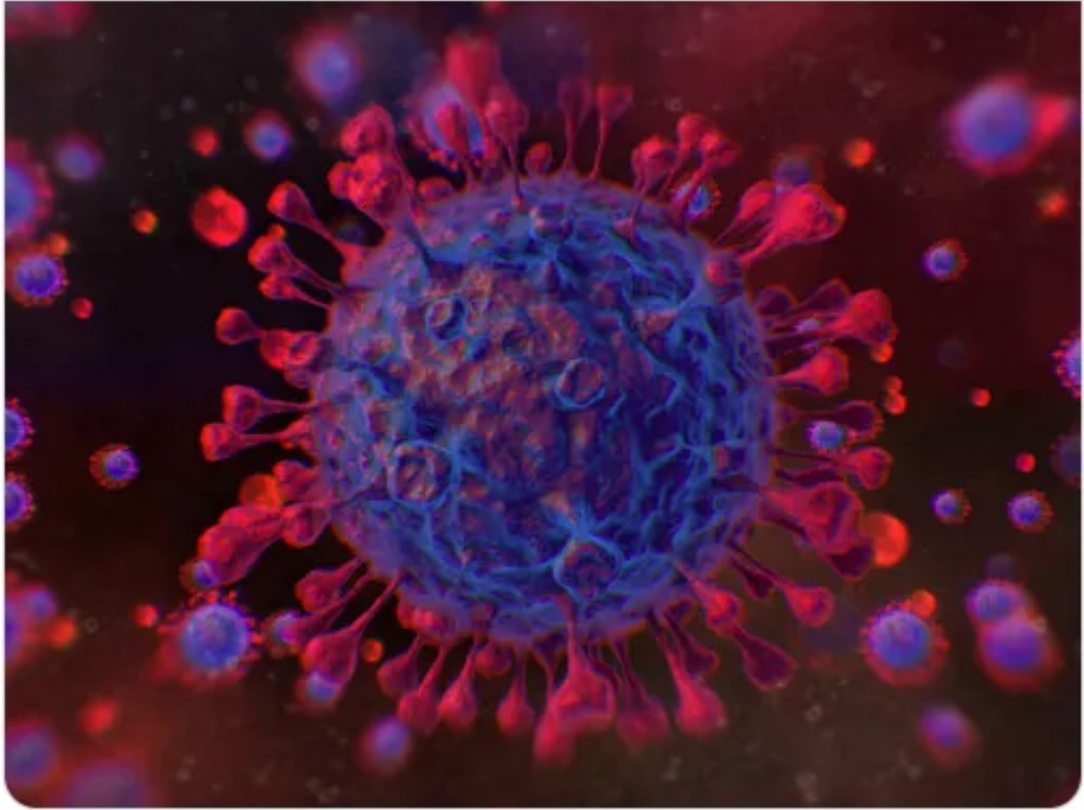

Rasmussen Reports ✓ @Rasmussen_Poll · 8m

COVID-19: Virus Deaths vs. Vaccine Deaths

Nearly as many Americans believe someone close to them died from side effects of the COVID-19 vaccine as died from the disease itself.

[Subscribe](#) [13](#) [Share](#) [Download](#)

Watch the whole thing, but here are the two most important slides:

Has any member of your household died whose death you think may have been caused by side effects of COVID-19 vaccines?

Survey of 1,078 US Likely Voters conducted March 27-29, 2023
by Rasmussen Reports, MOE +/- 3%

The full report

You can read [the full report here](#).

Confirmation in the peer reviewed literature

It will confirm the work of [Mark Skidmore](#) and [Denis Rancourt](#) as well as my work on VAERS and [my earlier poll asking the same question](#). We all predicted that the vaccine has killed about the same number of people as COVID, roughly over 500,000 Americans total over the two years 2021 and 2022. It was a disaster.

Here's [an earlier article on how to estimate the deaths from VAERS and where the 41 under reporting factor is calculated](#).

If you don't believe THEIR poll, poll it yourself like I did

I did this in June of last year, almost a year ago. If you don't believe the Rasmussen numbers, it is easy to do your own poll and see for yourself just like I did. *CNN* or *The New York Times* could easily do a Twitter poll like this.

Reader comments like this one are impossible if the vaccines are safe

See [this comment](#) on 6 vaccine-related deaths in 6 months in an apartment complex of 135 apartments. How are anecdotes like that possible if the vaccine is perfectly safe? The numbers reported here are not much different than the numbers reported in the poll.

See also Joel Smalley's comment that COVID deaths were probably increased by the vaccine as well, i.e., those who got the vaccine are more likely to die overall, and they are more likely to die from COVID as well. See my [Elephant deck](#) for the studies on this.

Joel Smalley Mar 31 · Dead Man Talking

As I said a long, long time ago, the vaccine has the exact same pathogenicity as the virus. But, as bad as this poll is for the job, it under estimates job damage. First, it cannot take into account the COVID deaths that were actually brought about by the job. Second, "long" vaccine is going to claim many more lives than "long" COVID.

These polls don't happen by accident

Summary

We were right. Nobody listened.

The polls show that the one thing in this country that both Democrats and Republicans agree on is that **the vaccines are as deadly as COVID**. That's stunning.

So will the mainstream media attack the poll? Or will they ignore it?

And why hasn't the mainstream media ever commissioned their own poll to show us the truth? And how will the fact checkers explain this away?

The poll validates the [Skidmore paper](#) which found that the "vaccine" killed over 200,000 Americans in 2021 alone (Mark estimated a larger number were killed in 2022). So the mainstream media knows what will happen if they do the poll: they will find the truth. This agrees with US government numbers (17,000 excess deaths in VAERS * and a minimum underreporting factor of 41). Here's [an earlier article on how to estimate the deaths and where the 41 comes from](#).

If there is one article to share with your social media all year, this is the one.

Best friend had stroke after one injection. Apartment complex where I work 135 two bedroom apartments - between November 2021 and May 2022 SIX people gasped for their last breath's after being boosted within that five month period. Another elderly lady tested positive for Covid unvaccinated went to hospital and was extinguished with Remdesivir and ventilator.

Here comes the distraction to move the laser pointer off of these psychopaths who belong in jail...

The neocons will get you killed says Martin Armstrong:

"Europe wants War at Any Cost... NATO will now stage the largest military exercise in history. It will most likely create some excuse to wage war against Russia. They need this war desperately to restart a new monetary system that they have been planning with Bretton Woods II. There is no remorse for those who die in battle. They do not care about the families driven from their homes. This is all in the political game of kicking the can down the road and always blaming someone else."
