I no longer mock the population-culling conspiracy theorists. The theory is well-founded. I never thought this form of evil was possible. Perhaps I have been dwelling under a rock for too long.

Stanley Johnson (Boris Dad) wrote a book about it. He's professing depopulation theories openly. Same as Billy boy Gates satanic father. Look who's in charge many years later...

@Todo, that is a solid change in thinking, I salute you for that. I thought about that too: "*is it even possible to say such things to nanny state people without overloading them?*" They all live their life and just do what all do ... most of the time that makes perfect sense, because you don't need to invest time to learn things, just follow. But on the long run you will be culled because of that, that is the law of nature. And after taking that hurdle, think about all the other conspiracy theories that are attacked by MSM ... and then understand, that 90% of that is true.

The term itself was popularized to describe those who doubted that magic bullets from a POS 6mm Italian rifle killed JFK.

If it makes entirely too much sense, it's probably true.

I'm one up from a heretic -- I'm an Apostate !

I've said it before, but I'll say it again:

If Galileo were to come back today, he'd say nothing has changed. Except the names.

People used to say, "God is dead". I have no idea, but if he's there, he probably doesn't care what people say about him.

But I will say, "Science is dead". Long live the "Follow-the-Science" Religion.

Kugelhagel,

No, you've gone a step too far there. "Heretics" perverted the truth because they were not of the Truth.

There is perhaps 1 conspiracy that you don't understand.

They don't use the word "heretic" since the 1960s and 2nd Vatican Council. That is when the heretics and revolutionaries created a revolution within the Catholic Church. Since then "heresy" is not mentioned so as not to upset heretical creeds for the purposes of "ecumenism" and because the heretics have taken over large parts of the Vatican hierarchy. Pope Francis is a logical result of the 2nd Vatican Council: a coup d'etat by enemies of the Church.

The Church, however, remains the mystical body of Christ, even though it has Judases in the midst of it. It's salvific role remains "and the gates of hell will not prevail against it."

And of course "conspiracy" exists in many areas. The crime of "Conspiracy to commit a crime" is on the statute book of every country's criminal justice system worldwide. The devil himself is a conspirator (tries to pretend he doesn't exist) but his agents are forever carrying out conspiracies. Who is the devil after all but as the Bible describes him: "a liar and a murderer from the beginning."

▲ 1 ▼ 1

Blue Snowflake 4 days ago

The problem was the heretics were out of their lane. Stick to explaining the cosmos, not telling the Church how to handle its affairs.

AN EXPERIMENT ON MILLIONS OF PEOPLE!

German Chancellor Merkel admits vaccines are...

*...All of these vaccines are conditionally approved. In the course of this conditional approval, **we are gaining experience for the first time on what happens if this vaccine is used on millions of people...that is why everything is monitored so specifically - what side effects can happen or what cases or what certain things can occur.**"*
 Angela Merkel - March 19, 2021

Reporter, "Ms Merkel...are you vaccinated?"

Merkel, "No I am not, am awaiting my turn (based on age, risk, etc.)"

That was in March, in April, her press office released a piece of paper showing she was vaccinated...lol...**YESTERDAY**, June 21st, she was vaccinated again? Yep, claims "mixing" the vaccines will give better results...of course, no live on camera needle jab...I won't believe any of the politicians are truly shot up unless they go to a "drive thru" vax station in an unmarked car and a bottle is picked from a large lot.

I'm always on the look out for new conspiracy theories, because my old ones all turned out to be accurate.

It was a brilliant psyop by the CIA to invent the term to cover up the murder of JFK. But if one takes a cursory look at it, how is a conspiracy ever to be exposed without a theory that there is one? If every time someone proposes a theory regarding this or that possible conspiracy, they are swept into the kook dust bin, how will any conspiracy ever be exposed? Hence they aren't, unless iron clad evidence of their existence is encompassed by the theory.

▲ 17 ▼ Reply ↩

truth or go home 4 days ago *(Edited)*

You can blow the JFK story out of the water in 5 minutes with observation of two famous photos. Look at the two photos of the Oswald shooting. Look at the location of the stationary people in the background and see that they are in different positions in the two photos. Which makes the two photos supposedly of the same event taken at almost the exact same instant incompatible with one another. Case closed. Conspiracy confirmed.

Why no one has done that in the nearly 60 years since, I don't know. I did it the first time I looked at them side by side.

For a few years now, we've had some fake conspiracies. Flat earth, chemtrails, aliens, etc. and some fake conspiracy theorists like Alex Jones to take people down a rabbit hole. I think these are carefully planned diversions.

I've considered the idea that there's no organized effort to cull the population more crazy. It's very obvious and logical. Global population has exploded, they keep screaming about how humans are destroying the planet - and yet the idea that some of these elites have organized a plan to reduce population is nutty? I don't think so.

Too many people are stuck in normalcy bias and are too trusting of the modern elite class. You don't have to look back very far to see the unspeakable atrocities powerful people are willing and able to commit.

My guess was depopulation due to lower **EROIE** on petroleum. Deathcross of the fossil energy (oil) available was near to us, maybe we already are behind peak oil. Eolians, solar panels and EV are an energetical leftist joke and will never be an alternative to nuclear/ charchoal power plants and thermic motors.

I was thinking about it for quite some time. Why all this Covidian Cult was necessary for? What does it produce? Lockdowns was a main response worldwide.

Was it usefull? absolutely not. No more planes in the sky, economic slowdown, **a lot less of enegy used**. I guess this sanitary madness was all about cheap energy we can get from oil. The human population exploded due to the industrial revolution, the machines, their capacities and -in fine- oil made it possible. If you do not have enough cheap oil and the EROIE is way to high, then the industrial technology we live in can no longer be.

The Covidian Cult produced what an energy crisis would have made. So if it is the case, depopulation will happens no matter what at some point in the future. Our Elites Ovelords already knew this and they planned a soft way to make it happen, keeping and even tightening their reign. Our monetary and economical system was already living dead before the Covidian Cult. Their Great Reset is just rebooting the dying system with a lot less people around and more coercitive power for our rulers.

mRNA vaccines maybe only are a tool in a larger depopulation toolbox.

There is not enough vaxxed, (not in France anyway). Our crooked government and his MSM minions pushes so hard in various ways to make people embrace this mRNA poison.

I guess this is the main reason why the WEF is planning a huge "cyber attacks event world wide" in November /December. WEF's Cyber polygon this July is a drill for the next stage of the Great Reset. Shutting down the grid, let the plebes eat each others. Wait several weeks then put the lights back and come as the saviors.

▲ 4 ▼ Reply ↩

Ride_the_kali_yuga 4 days ago

Yeah, the gene pool is over crowded with genetics defects. See diabetics, i mean "genetical" ones since a young age. Insuline was a great discovery, it saves a lot of people at some point. Then without the natural selection they had kids of their own and has a consequence they spread their genetic defect in the gene pool. Sometimes great inventions make unintended results.

Diseases are a way for nature to get rid of the olders and the weak. It is not moral, there is no justice in this, this is just the way nature works. Human tried damn hard to break nature's law, the thing is, there is consequences playing god.

▲ 6 ▼ Reply ↩

bigjim 3 days ago

A species that doesn't have mutations can't "evolve" through natural selection to adjust to the ever-changing environment. But the mutations that don't add to the species' ability to survive need to die out.

Mankind's physical evolution has slowed down, if not reversed. Welfare incentivises the unproductive to breed, whereas in the past they'd have starved to death.

I'd be surprised if IQ averages haven't declined in the West in the last 50 years, even if only look at ethnic Europeans.

▲ 2 ▼ Reply ↩

Ride_the_kali_yuga 3 days ago

I agreed. With no more natural selection the gene pool become saturated with a lot of genetic defects. Dysgenism is the new normal, land whales are heavily promoted and so on, and so on. Add to this the screens everywhere and most people have an attention spawn of a dead goldfish. Dopamine addicts to social networks and here you are.

The homo "numerus", the last evolution of the homo sapiens is, for the most part, a regressive creature. Here comes the devolution, the median IQ drop more and more due to those factors and some others. Abundance of processed industrial food, welfare and corn syrup was the downfall of the modern man.

There is a theory, at some point, most people will get way too dumb and progressively the entire infrastucture will break way, no one will be able to fix it. IQ and hard working men, -in huge part- made the society as we know it. I guess it won't last long, even if the depopulation event occurs.

That's because, contrary to the emotional opinions of scientists, the gene pool is subject to the 2nd law of thermodynamics just like everything else. Natural selection slows it down a bit, sure, but genetic mutations are always a loss of information. Technology and ego evolve. That's it.

Four nurses arrive at heaven's gate after having lost their lives.

They stand, hesitant in front of St Peter The Doorman. . "WHY ARE YOU DEAD ?" said the holyman with a booming voice that echoed way past the first nurse in the queue, turning her ... green. "Well sir .. I took the Paizer vaccine 12 months ago, and, and ... an escape variant took my life today". "HMM I SEE" said Peter while scribbling something on his pad. "WHAT ABOUT YOU ?" said loudly the white bearded man looking at the second nurse in the queue, who seemed colored yellow. "Well haii, sir, I took the Boderna vaccine eighteen months ago, and today I developed a nasty case of the ADE syndrome". "MMM" nodded the man, " ... A.D.E, I SEE" he said with an intense scowl that sent an angel flying scared away. "AND ... WHAT ABOUT .. YOU?" he asked looking to the third nurse, who had a hazy shade of blue. "Well, sir, what can I say, I took an Axtabeneca booster to avoid the mutant variant that kills the vaxxed, but a bloodclot gave me a stroke 10 minutes ago". "MMM OK ... bloodC.L.O..T" said trying to spell it right. "Bouncing is a hard job" he thought to himself while trying to flex. Then way back in the queue He noticed a normally colored but quite startled nurse. "HOW ABOUT YOU ? WHICH VACCINE DID YOU TAKE ?". "Oh None sir. COVID and its mutants were never an issue for me as I had the ... natural infection a year ago. I am here because of a car accident". A thought crossed his mind. "AHHA!" said pleasantly surprised the holy man "A-- KAR AKS.IDENT" while scribbling proudly. "SO ... WE WERE DRIVING A BIT ... FAST WEREN'T WE ?" he asked with a beaming smile that could light a thousand lightbulbs. "Well, no, sir, but the nurse with the axtrabeneca-vax did"

Thank God for some common sense at last, vaccinating children was morally and ethically reprehensible and scientifically unjustifiable, even to WHO and Gates (But I repeat myself).

Children hardly ever contract the "disease" and when they do it is almost always like a very mild Flu with no permanent effects. And because asymptomatic infection does NOT transmit virus, the entire argument that kids can spread the virus so need to be vaccinated was always scientifically incorrect. In that context, therefore, any "vaccine" death or severe, life-changing AE - even just ONE - is one too many to justify the vaccination of children..

There has been enormous pushback against the vaccination of children - so much so that even the Globalists have had to back off. At least for now.

EDIT: My comment has now been invalidated by the WHO changing its position regarding vaccination of children, obviously under pressure from somewhere. Although my "At least for now" comment was prescient and became relevant in less than 24 hours!!

Maybe but I doubt it. IF you were planning a global eugenic population cull (Think Deagel proportions) you would start by taking out the elderly - they cost too much to care for and are draining the social security and pension funds that they still plan to steal. Then you would sterilize the younger generations and children - or as many as possible of those who could as quickly as possible be persuaded to agree to the necessary intervention with a free pizza or ice cream before the totally obvious lack of morality became openly apparent, even with the censorship?

Pretty sure you've got that arse about face. The USA ingredients tend to be worse than European ingredients.

For instance, the widespread use of Potassium Bromate (added to flour to make dough rise higher and turn stark white) and Azodicarbonamide, or ADA (a whitening agent for cereal flour), are common in the US, but not allowed in the EU for human consumption. ADA is a dough conditioner to make bread stay soft and spongy longer. It is also used to inject bubbles into certain plastics to manufacture soft, spongy goods such as yoga mats and flip flops, gaining it the name the “[yoga mat chemical](#).” Potassium Bromate has been found in lab animal [studies](#) to increase benign and malignant tumors in the thyroid and peritoneum (the membrane that lines the abdominal cavity) and cause significant increases in cancer of the animals' kidneys, thyroid, and other organs. [The EU, Canada, and Brazil](#) deemed this information enough to ban these products from their food supply. The US did not.

My youngest daughter is 19, will be a sophomore in college in the fall. Her best friend since grade school, Brooke, received the vax and had her second shot in early May. Brooke spent the week with our family in Hilton Head a several weeks ago and was just fine. Fast forward to last week and we learn that Brooke needed her parents to take her to the emergency room of a nearby suburban hospital on Tuesday morning at 1:30 am. By noon on Tuesday, the local hospital realized this was serious and she was life flighted to a hospital in the city. For the past week she's been on life support and in critical condition. If her heart doesn't

return to normal, she'll need a heart transplant. She had no prior history of heart issues and this doesn't run in her family. She was subsequently diagnosed with Myocarditis caused by the vaccine.

This is a disaster, as young adults at this age have virtually no risk of death from Covid, so there's absolutely no reason for receiving a vaccine that has unknown risks and for which we're learning is deadly to many young adults and is affecting hearts. If your children have been vaxed and they begin to experience shortness of breath and / or chest pains get them to the hospital immediately.

This fraud is being perpetuated by all major institutions and anyone who raises concerns about the group think is immediately banned from social media. Front Line Doctors have had their web services discontinued by AWS. All because they've raised concerns about the vaccine and questioned the narrative. And yes, big pharma is behind this, as they have a drug to treat Covid, Ivermectin but because it's out of patent, they can't make money on it, so they push these experimental vaccines.

Both my daughters attend large state universities and both have been under significant pressure to get vaccinated. Both had Covid and survived with no issues. My wife and I also had it, no big deal, as we don't have preexisting conditions. Given my wife and I are concerned about the affects of the vax, we have forbid our daughters from getting vaccinated. My oldest wants no part of it and my youngest was arguing with us that she should just get it, as it would prevent her from having to get tested twice weekly at school in the fall. She's now thanking us for our conservative posture on the vax.

And if you haven't already bent to the pressures to get your children vaxed, do not do so! The Vers data is way underreported, as it's voluntary and the government is ignoring the warning signs from all the negative reactions.

God help us. Please pray for Brooke.

A Doctor Reacts to Bills Receiver Cole Beasley's Refusal to Get the Covid Vaccine

[Cole Beasley](#), wide receiver with the Buffalo Bills, caused a stir on Friday when he shared a statement on Twitter in which he asserted that he would not be getting the Covid vaccine. "Hi, I 'm Cole Beasley and I 'm not vaccinated!," he wrote. "I will be outside doing what I do. I'll be out in the public. If your scared of me then steer clear, or get vaccinated. Point. Blank. Period. *I may die of covid, but I'd rather die actually living.*"

"I 'm not going to take meds for a leg that isn't broken," he continued. "I'd rather take my chances with Covid and build up my immunity that way. Eat better. Drink water. Exercise and do what I think is necessary to be a healthy individual. **That is MY CHOICE based on MY experiences and what I think is best...** If I 'm forced into retirement, so be it."

check the picture of Cole Beasley the MSN link is using .. nice framing job there, propaganda ministry of truth apparatschicks.

put "Dr" Mike Hansen on the list of accused for the Nuremberg trials

"There's really only one valid medical reason why someone shouldn't get the vaccine," he added. "If someone has a severe allergy history when it comes to getting a vaccine, that could be a legit medical reason."

While Beasley has made a personal choice, Hansen explains that when it comes to the vaccine, the decisions we make about our own health affect outcomes for others.

"What's going to happen is you're going to have other variants of the coronavirus, like the Delta variant which originated in India and is all across the globe and is in the United States," he said. "Not only does it spread easier, it's thought to be more infectious, more dangerous. Over time that has the potential to overcome those who are vaccinated. It could be that the vaccines work for a little while, but because we don't reach that herd immunity, that virus never goes away. The other aspect of not getting herd immunity is, those who can't get the vaccine, like children, then you're making them more prone to the virus."

His scientific statement is utter garbage. The "virus" isn't likely to effect more unvaxxed, because of a higher rate of vaxxed. That's the "new normal" logic and it's failed like so many other arguments they're making.

The vax doesn't provide herd immunity. PERIOD. At best, if the "spike protein" theory is correct, it will provide marginally better chances to beat the severe symptoms. That's a big IF. Double vaxxed are now dying in larger numbers, months after they completed the experiment. That was predictable.

Guys like Mike Hanson need to be paid a visit. At minimum, a proper dead horse's head on this guy's pillow. If he doesn't stop, he needs to be taken out into the woods.

I'm not joking. Real men need to start doing real God's work.

Get that Dr to get the indemnity removed so people can sue and get economic damages for injury and at the same time remove the EUA that has overridden commonsense if it is so safe.

Government compensation for vaccine injury is a block put in place to protect big pharma and it prevents people getting help with living and medical costs that can run into \$M really quickly if you are crippled by the vaccine.

He should be at a minimum crippled and then made to pay his own medical costs.

Hotting up now though! Their goal now is to now blame the unvaccinated for vaccinated people dying from a failed vaccine ... in that the vaccine cannot protect you from virus mutations ever so it is a once yearly booster for everybody on the planet every year.

These people are now so corrupt that the results of elections cannot even be trusted anymore. The UK has now become a literal concentration camp where only those willing to take regular experimental drugs are allowed to leave - while admitting that they wont stop you getting the virus or spreading it. Medical apartheid is now being normalised as is the idea that this is an escaped "bioweapon" (if it is they failed miserably considering the low death rate) but this will give them the powers to declare this a national emergency, grant the military powers which will eclipse your human rights facilitating forced procedures and containment in camps.

Education, Medicine, local governments...

They don't have a care in the world that they've destroyed trust in most of the population.

Worse than that, they know many of us know, they are intentionally murdering people worldwide.

THEY are even injecting airline pilots knowing many of them will die or have strokes/heart attacks mid-flight without warning.

You could say, well they don't care if a plane goes down and people die.

And yet, these psychotics have private planes who are not safe in the sky with other planes piloted by injected ticking time bombs.

What's the end game here for a ruling class who is just fine destroying absolutely everything?

I do not believe we are dealing with a human ruling class here.

Amish, regardless of their religion are perfectly healthy, their children get zero vaccines/allergy. I wonder why?

Most vaccines are based on a lie, the father of vaccine theory Pasteur. To Pasteur maniacal vision of diseases and human immunity, i found Béchamp approach much more pertinent. Pasteur saw the human body as a battleground against germs attacking from everywhere, some kind of trench war vision. For Béchamp, the ground (environnement) was everything, the health was multifactorial, there was no "war" path.

At the same time vaccines were made in masses, nutrition, cleaning of the body, home improvement also greatly improves. The shiny crown most people put blindly up into vaccines and what they think "science" really is show a false comprehension of medical history.

Many of these people are in the medical industry.

They don't understand people don't die from the common cold or flu.

They die from other issues.

One family member died the day after his Pfzzzzzer shot.

He had a heart attack.

99% of these family members see no correlation between the injection and the heart attack/death.

They believe he died of covid==

No matter what evidence I show these people, they look right through me and believe I'm insane. I stopped talking about it with anyone. I've come to terms that this is their life and if they want to go a hundred miles an hour toward Logan's Run, that is their choice.

Our kids are not some cannon fodder for the elite's wars! Only despots and tyrants do this when they're running out of options. Feeding kids into the lines of fire. We have a Nuremberg code and a Geneva convention for a REASON!

The vax is garbage!

Absolutely NIL benefit for your health, only benefit to your social credit score.

Go ahead, get vaxxed if you feel like it. Know the risks, and inform yourself what the ridiculous and negligible advantages are of having the synthetic toxins injected into your system.

The side effects FAR outweigh the risks of potentially getting sick from whatever it is, circulating out there. If your body is too weak or your system is responding badly to the "virus", it will also respond negatively to the injections. When your time has come, your time has come. Life is meant to be lived. After 2+ months of having doctors treat my post first shot health issues as "anxiety", I stopped their anxiety medicines and started treating myself for myocarditis/pericarditis/POTS and am feeling better after 2 days. Modern medicine is too bought into the vaccine being safe, as my cardiologist, general practitioner and pulmonologist all got it wrong. I am well educated and know medicine well given decades with rheumatoid arthritis. I feel sorry for the average person who listens to these clowns.

Social distancing was ineffective.

COVID is 99.9% survivable.

Lockdowns caused severe societal degradation and familial problems.

THE MSM was complicit in spreading the fear and lies.

Healthy people have NEVER been quarantined in the past.

Older Americans that lived through the 1976 Swine Flu Scam-o-Rama smelled a rat immediately

.GOV, the CCP, Gates, Sore-ass, the WHO and the Globalists created this fake epidemic ON PURPOSE.

But BELIEVERS are able to accept the two conflicting statements, as per 1984: " In 1984, doublethink is the act of believing two contradictory beliefs to be true at the same time without questioning or displaying doubt. The citizens of Oceania must engage in doublethink in order to not be vaporized, and in doing so, they deceive themselves. "

▲ 2 ▼ Reply ↩

I don't even think it's that, not today. In Orwell's day logic was still taught.

"Doublethink" was a means of circumventing it. My formal education never taught any logic. It just taught me to scribble down what I was told. Most people don't need "doublethink " because they have no training in logic to overcome.

▲ 3 ▼ Reply ↩

bloofer 3 days ago

Logic and critical thinking was never, in my recollection, taught in schools, and I graduated from high school in 1965. About as close as they got to teaching this was in some of the more advanced science and math classes that required reasoning your way to the correct answer, at least to some extent.

I'm not entirely sure where I learned to reason logically. It seems to be something that you pick up randomly over a period of many years and gradually learn to apply. The first step is always developing the habit of critical thinking, which mostly amounts to not believing everything you read and hear. Other people's **words, both spoken and written, must first lose their power over you.** Most people, for example, will automatically believe whatever gossip is going around their neighborhood or workplace. And if it's in writing, it might as well be Holy Writ.

The shots are “safe and effective,” the propagandists proclaim.

That's absolutely true. Until some woefully ignorant, or psychopathic imitation of a human being injects them into someone.

Anyone with two or more brain cells that get along, and has paid the slightest attention knows that those under 20 are virtually immune to the virus, and those under 40 are no more at risk than they are from the common cold, and those under 60 with no other serious co-morbidity are only at slight risk. There is no logical reason to vaccinate ANYONE under 20. Very little reason regarding those 20-40, and choose your poison if you are 40-whatever. At 67 I've chosen to take my chances without participating in a medical experiment.

Regarding safety, they are the most dangerous vaccine ever produced, much less deployed, even by the woefully inadequate results of under reporting to VAERS. By those results, the COVID vaccines have already killed about 6,000 Americans. More than all other vaccines combined for the last 10-30 years, and the year is only half over. Some of those other vaccines were pulled from the market because of as few as 50 deaths. Why do the COVID vaccines get a pass for 6,000? And that's just deaths. There are abundant other side effects, including mounting evidence of mental disability, and definite reproductive damage.

Covid vaccine Death total now stands at 6332 deaths reported to VAERS. Today's data show that between Dec. 14, 2020 and June 11th, a total of 358,379 vaccination adverse events were reported to VAERS.

Yeah, and studies show that only 1% up to 10 % of actual vaccine adverse events are ever reported to VAERS.

The actual vaccine death count is either 10 times 6332, or worse case 100 times that. The CDC, NIH, and WHO are either incompetent, corrupt, or both.

The Swine flu vaccine killed just 50 people, and they yanked it off the market !!!!!!!

There are people dropping on the floor after getting the Covid vaccine all over the place. I know of a bunch of people that got fu**ed up from the vaccine. One of them was a 40 year old guy with a mild heart condition, and died after getting the non-vaccine. Big hush hush, no one is supposed to connect the dots.

This is a tragedy. Totally unnecessary. Totally preventable.

Close to 100% Covid survival rate for anyone under 60 years old with no co-morbidities.

For children and young to mid age adults, the case fatality rate is the same or less than the regular flu every year. Fact. Unless you are really sick (2.6 or more co-morbidities), or are really old (80) and also sick, then Covid is less deadly than the regular flu. Fact

Vaccinating children and healthy adults is not necessary, and adds unnecessary risk.

Vaccinating them should be prosecuted as medical malpractice and child abuse.

MASKS;

Masks are not effective at all. Multiple studies done in the last twenty years, some of which were on the CDC site last year.

'They' knew since 1918 Spanish Flu that masks do jack diddly, nada, zip zero zilch.

Also, the 'study' does not mention all the negative health consequences of the face diaper,

plus

the face tampon acts as a wonderful mode of transmission from dirty hands touching it all the time.

Yeah, a wet stinky snot covered moist germ fungus bacteria mold breeding ground is 'healthy'. F'king retards.

Bonus for all you dipstick rancid Karens out there; how much face diaper plastic waste has been created since this Covid stupidity started ??? Hey Karen, I thought you banned plastic bags and straws to ' save the world ??

Now, how about people who are immune because they already had the virus or carry immunity from previous covid exposures?

Yeah, funny how that is never mentioned anywhere in the MSM, or by any 'health' agency. Why should people that are naturally immune get a covid vaccination. ??????

CDC, NIH, and WHO are run by morons.

There's no such thing as curing anything. The immune system works & wins a battle or it doesn't. You can successfully manage a disease but you can never eradicate one or cure someone from one. A virus or bacteria are as much a part of nature as water is. Nature controls nature. We either learn to live within laws of nature or we die. Same for every living thing.

Injecting the nucleic acid genetic material to force my cells to create and release into my bloodstream trillions of foreign pathogens called a "Spike" Protein that is a Chimera engineered in a lab doesn't sound like a wise idea....

It is already well known the spike protein from the vaccine does major damage to the heart, lungs, brain, pancreas, spinal cord, brain, and DNA, and collects in the eyes and bone marrow....

So I'm gonna not get this genetic vaccine.

I'd rather be injected with the actual Covid Virus, where the spike proteins are hindered by being anchored to the bulky virus envelop.

The spike proteins resulting from the genetic vaccine are free floating, and can morph into 10 different shapes to avoid the immune system and freely slice into blood cells, arteries, the brain, heart, the DNA, and any tissue they please.

Isn't the claim not that the "vax" "delivers the spike proteins into cells", but genetically instructs human cells (which cells?) to manufacture the "spike proteins", after which the spikes appear on the surface of the cells or float around the body willi-nilly; I have not yet read an explanation which.

NEW: Former Head Scientist at PFIZER Says Covid Threat is 100% FAKE

<https://redpilluniversity.org/former-head-scientist-at-pfizer-says-covid-threat-is-100-fake/>

Prior to forming his own biotech company in 2011, **Michael Yeadon was the Vice President and Chief Scientific Officer for Allergy & Respiratory Research at Pfizer Pharmaceutical.**

He is a top scientist in the world of drugs and vaccines in the treatment of respiratory diseases such as Covid. In this video he declares that the Covid pandemic is a fraud. He explains why masks are useless, why distancing is absurd, why PCR tests are meaningless, why quarantining healthy people is stupid, why variants of virus strains are no threat, and why Covid vaccines should be rejected.

Yeadon says many of his colleagues privately agree with this appraisal but remain silent to protect their salaries and research grants. It's all about money.

He concludes that, because of the massive number of deaths that will follow within a few years of vaccination, there clearly is an agenda to deliberately eliminate billions of people from the Earth and to enslave those who remain plus much more.

[This scientist is such a good, brave man. He loves humanity. His voice is being silenced on mainstream media and he is putting out this info to the public despite being smeared and attacked (though they don't address his facts at all). So:

Pse share this video out to at least 5 other people as he gives simple scientific explanations for all his statements.

I saw him on Del Bigtree's Highwire program. I was not impressed with him in general. He did have some good points, but he also thought that any vaccines should last forever - he didn't seem to understand the differences in naturally acquired immunity vs vaccine driven immunity.

He also had convinced himself that there is no such thing as asymptomatic infection - for any infection.

That is, if I understood what he was saying correctly.

The jabs will injure a higher % of kids than the virus will.

Who would think of doing something along these lines?

Also, when is the FDA going to acknowledge the dozens of peer reviewed studies showing the efficacy of Ivermectin and HCQ? That would make vaccines not only unnecessary from a medical perspective, but illegal according to the rules of the FDA.

The "science" is changing daily to align itself with the required official narrative.

So, in the UK, when Bluster.Boy.Boris and his sidekick Matt Halfcock say:

"we follow the science"

what they mean is:

"we follow the science after they've aligned it to match our required narrative"

I've heard that hypothesis before, and while it could be true, I find it more likely natural infections such as cold or flu will be the killer. These mRNA treatments (which have similar ultimate results to the vector jabs) have been tried on animals in years past and from what I understand they responded well initially but suffered badly when later exposed to other natural infections. Their tweaked immune systems went into overdrive adding damage to an infection it was not well suited to prevent. Beyond that, having a two part kill shot doesn't leave much in the way of plausible deniability.

When I consider the damage done to the human organism as a public (government) policy since around 1950, the most striking thing to me is how hard humans are to kill.

We've had several generations of food whose nutritional value has been greatly reduced and then laced with poisons and adulterants of all kinds. Much of what we eat is not food at all, but rather "food-like substances." We've had several generations injected with ever-increasing numbers of vaccines. The drinking water has had fluoride, pseudo-estrogens, and God knows what other crap in it for generations. (I cured my Graves Disease when I stopped drinking tap water--and our local tap water is said to be some of the best in the US, and fluoride-free.) Our environment is laden with pseudo-estrogenic plastics, pesticides, and herbicides that are endocrine-disruptors.

The net result of all this has not been mass death, or even any very significant decline in life expectancy, but rather epidemic levels of poor health, which you see mostly in the form of obesity and diabetes, heart disease, and cancer. Until recent years, life expectancy increased, but this was probably owing mainly to antibiotics and public sanitation.

Those of us whose parents were among the "Greatest Generation," notice a huge difference between them and modern populations, in terms of physical strength and vitality and general good health.

I suppose it's possible, and maybe even likely, that the covid vaccine will turn out to be just one more source of debilitation and chronic disease for most who have taken it. On the other hand, it could kill a lot of them, and has already killed a lot of them.

So WHO has obviously been instructed to retract its earlier logical (medically and ethically) position? WHO also quietly changed its definition of herd immunity to exclude natural immunity, which is medically and epidemiologically FALSE. Another WHO "vaccine" supporting position at the exclusion of anything else. It's getting difficult to take anything that WHO says seriously.

The only conclusion possible when confronted with this behavior is that there MUST be another - non Public Health related - reason for wanting to get the experimental gene therapies into everyone quickly, including children (where the "vaccine" AE risks cannot be medically or ethically justified) and pregnant women (who could just as easily wait until after the birth in view of the increasing number of "vaccine" miscarriages). It's literally the only explanation that makes any sense.

Perhaps they know that perhaps ADE or other AE is going to start affecting large numbers of people during the next winter Flu season so they must move fast?

Perhaps there is something else in the "vaccines" (interesting that there has been no independent analysis done)? Sterization (at Deagel proportions)?
Programming/surveillance?

Perhaps they want "Vaccine Passports" in general use for digital ID and social control purposes?

Perhaps all of the above?

I obviously don't know but there is definitely something wrong here, which will become obvious in due course and probably quite soon. We need to keep in mind that this "disease" has an overall survival rate of 99.7% (99.95% in those below age 60). Does that really justify what is going on? All the FEAR!!!! lies and propaganda?

The plan is consistent: inject as many people as possible and then kill quickly using 5G frequencies resonant with the injected graphene. The process may take one to two weeks for the entire planet; a time short enough to avoid any possible organized reaction and generate discouragement in the surviving population. Except for the small number of people who can speak to their conscience like this: "you were warned."

Rollout 5g phone tech and inject with shots that cause the body to become magnetized. New study in Luxembourg shows that after one shot the arm is magnetized, and after the second shot the whole body is magnetized.

When you put the shot together with the 5g, who knows what will happen.

The CDC is literally pushing an injection that is giving babies/children heart attacks

and now, out of the blue, they're like "Oh yeah, babies are having heart attacks and we don't know why?"

I don't have children, but if I did, every single psychopath at the CDC and pharma companies murdering children with their poison would be hunted down and put down for good.

I kept trying to explain that the 'flags' changed the meaning of posts, whether aesthetically or artistically -- the communication was being altered, and that therefore Facebook was committing libel by falsely attributing authorship to my name, when in fact 'my' posts were being changed into something different by them. In addition, this running interference by the middle-man made communication dangerous and unreliable.

My software developer friend usually seemed like the intelligent kind, but he seemed to be in some kind of creepy trance, and weirdly motivated to defend Facebook at any cost. That's when I finally bailed and never looked back.

[COVID-19 mRNA Shots Are Legally Not Vaccines](#)

By [Joseph Mercola](#)

[Mercola.com](#)

February 11, 2021

Did you know that mRNA COVID-19 vaccines aren't vaccines in the medical and legal definition of a vaccine? They do not prevent you from getting the infection, nor do they prevent its spread. They're really experimental gene therapies.

I discussed this troubling fact in a recent [interview with molecular biologist Judy Mikovits, Ph.D.](#) While the Moderna and Pfizer mRNA shots are labeled as "vaccines," and news agencies and health policy leaders call them that, the actual patents for Pfizer's and Moderna's injections more truthfully describe them as "gene therapy," not vaccines.

Picked up this article and pasted it in an MS Word docx. Interestingly you can't find it by Google search - Censored

Miscarriages are now being seen in unvaccinated women who came in contact with vaccinated partners due to SPIKE PROTEIN SHEDDING.

COVID-Vaccinated Can ‘Shed’ Spike Protein, Harming Unvaccinated

Second, unlike conventional vaccines, these spike proteins, along with “*lipid nanoparticles*” have the capacity to [pass through](#) the “[blood-brain barrier](#)” which provides special protection for these sensitive areas of the body.

“There simply has not been enough time to know what brain problems and how often a brain problem will develop from that,” the document warns.

Risks from such penetration include “*chronic inflammation and thrombosis (clotting) in the neurological system, contributing to tremors, chronic lethargy, stroke, Bell’s Palsy and ALS-type symptoms. The lipid nanoparticles can potentially [fuse](#) with brain cells, resulting in delayed neuro-degenerative disease. And the mRNA-induced spike protein can [bind](#) to brain tissue 10 to 20 times stronger than the spike proteins that are (naturally) part of the original virus.*”

Third, as these experimental vaccines produce many trillions of spike proteins in their recipients, these vaccinated individuals " can shed some of these (spike protein) particles to close contacts, " causing disease in them.

Phizer KNEW THIS! It was published.

I am sure that Fauci told Trump what a great man he will be and that he will save the world from this cruel, awful (pseudo) pandemic, if only he would act now! The world will hold him to be a hero of historic proportions. LEGEND.

This is why Trump would NOT SHUT UP about all the lives that he was saving. He could not understand that he was dancing like a puppet to an agenda.

What is more sad is that there are not enough people who understand that he was outsmarted. It does seem like many have lost some of their enthusiasm for Trump. But I have not seen much -- not any really -- about the fact that he was outwitted. However, I am concerned that there can never be a "great solution" as long as whoever the point person is has a family that they have to protect. How does this game get turned around if the larger, offensive efforts are truncated because most decent people are going to have others around them that they care about and want to protect. Because we are dealing with evil that wants us all dead -- apparently.

I don't know if he was outwitted or he was forced into it.

The way things ended with Trump was tragic. He had everything lined up to take them down, yet he didn't pull the trigger. He must have calculated that he couldn't win. Or he was threatened. Or maybe the naysayers are right and he was part of it all along.

No matter - the outcome is the same - our country is under full frontal attack and he didn't prevent it.

▲ 2 ▼

drivel_news 4 days ago *(Edited)*

DeSantis has the hot hand. Or, at least on the surface.

A recent poll had DeSantis topping Trump, showing that Trump is still highly valued but his position might be eclipsed by DeSantis.

Trump had his chance. It is an AWFUL idea to re-install him. He will (a) fail to select a set of solutions that are needed as he does not have that interest or intellect for a range of ideas, (b) and now that he has been tested, he is 100% understood and known and thus controllable

drivel_news 4 days ago

I don't think Trump was part of it. Those who constructed that logic were always deficient in how they got to that conclusion. However, given how calamitous everything is now, who knows.

-- Trump hired awful people

-- Trump did not even fire Fauci

-- Trump should have fired Mueller, Day 1, and established a bipartisan commission instead

-- Trump should have fired Wrey, who is still there

He purposes his action on being defensive; his was out-strategized, understanding that he cannot think offensively, or plan with a level of complexity. He was too use to instincts that were dependent upon fast action as events arose; he could not quarterback the game. I watched Trump like a hawk from his first day. He was outsmarted; he could have turned the tables; he would have had to act aggressively. Trump could have pulled the country forward. He was really caring too much what his legacy would look like. He was confused and had a simple understanding about agenda, corruption, intelligence, bureaucracy. -- an infantile concept that if you just act right, these people will fall in line.

Mr. Rude Dog 4 days ago

You can't sue the vaccine companies... But doctor Bill Gates, the expert on everything is going to be wide open for lawsuits - that's why he got a divorce, so he can protect his money.

He openly gave medical advice on national television telling everyone the vaccine is safe, because he's an expert..!!

Not only did he tell everyone the vaccine was safe, he PROMOTED the vaccine and gave medical advice that was WRONG while scientific literature over the past two decades suggested this mRNA vaccine is not safe..!!

But now he's nowhere to be found.

What happens after the concentrations of the vax nanoparticles accumulate in the bone marrow, which they are doing? Perhaps leukemia? We don't know. But for some, it is more important to virtual signal that you and your children got the vaccine rather than its unknown consequences.

Robert Malone, MD, inventor of mRNA vax technology, is dismayed by Pfizer's study for Japan showing the vax nanoparticles accumulate in the bone marrow, ovaries, spleen, and lymph nodes.

He says there needs to be monitoring of vaccine recipients for leukemia and lymphomas because of these concentrations in the bone marrow and lymph nodes. He says these signals often don't show up for six months to 3-9 years down the road.

Malone says the FDA knew the COVID spike protein was biologically active and could travel from the injection site and

cause adverse events, and that the spike protein is very dangerous.

*He says **there should have been 2-3 year trials** to monitor for potential autoimmune consequences of the vaxxes, but of course that didn't happen. He says they also didn't conduct proper animal studies.*

Malone agreed with Vanden Bossche that conducting mass vaxxing in the middle of a pandemic is insane because of the danger of creating a more virulent wild Covid. — Nemo

Inventor of mRNA Technology: Vaccine Causes Lipid Nanoparticles to Accumulate in ‘High Concentrations’ in Ovaries

A 13-year old boy died three days after the 2nd Pfizer injection. The autopsy results show an enlarged heart and there was some fluid surrounding it. He had no health problems and was on no medications.

You're saying that viruses don't exist. I've heard that one before.

Please be the first to explain - that if they don't exist - what it is that creates symptoms (not just Covid but many others too). I'm open-minded on the subject.

Clearly people become ill from a plethora of etiologies, this discussion does not include genetic disease.

The best answer I can fathom is that colds and flu and so many other illnesses that 'go away' in ~3 days to ~12 days are your body dealing with and removing toxins that we are exposed to in the air (Chemicals, toxins, pollutants, poisons, particulates, dirty electricity, electromagnetic radiation from towers/routers/phones and much more), water (fluoride, chlorine, a million other chemicals, non structured water) and food (all kinds of chemicals, toxins and poisons in our food. I observe cold and flu are not contagious, of course one can read a few books on it for specifics and examples, including 'The Invisible Rainbow' and old studies: https://zenodo.org/record/1505669#.X8_YINhKiUI and

<https://www.nejm.org/doi/pdf/10.1056/NEJM191912111812401>

Bacteria within us (there are more bacterial cells in us than our eukaryotic cells, they are in every compartment and also inside our cells, bacteria do not infect us, they

are already inside of us and do exactly in us what we observe outside of us, they break things down and did not kill the animal or roadkill we observe in nature, they clean it up and do the same to our dying or necrotic tissue) can also cause toxicity by their breakdown products and fermentation products and of course their excreta can become toxic to us. An example is leaving an egg salad sandwich in the sun for 8 hours. The bacteria do no harm if you eat the nasty sandwich, the breakdown products are toxic to us and harmful.

Sickness, illness etc. and these symptoms are your body purging toxins and cleaning. Disease in this instance is removal of toxins and your body healing and 'getting better'.

I should mention that our emotions effect our health also. Being stressed and angry...bc of the fake news world they provide...will help make your body acidic, along with a bad diet (most people!).

And also, our bodies seem to talk to each other and have a biofield of about 6 feet. When your body observes someone close vomiting/fever/chills etc., perhaps your body is triggered to also purge built up toxins.

All these things together, various mixtures/exposures etc...illness.

Incontrovertible "data" was available and known to the WHO/NIH/CDC/NIAID that children under 14 have a negligible risk of death or serious injury from Covid19 in March 2020. The risks have actually diminished since then. Given these facts, the original recommendation to vaccinate the entire population, including the young, amounts to medical malpractice. If your clueless family doctor or pediatrician is recommending this experimental "vaccine" for your children, find another medical provider. The politicized agenda driven WHO is playing both sides, as usual, rather than following the science and common, reasonable, tried and trusted practices. Remember: The Government can't even get 40 percent of the workers at the CDC/NIH/FDA to take their "jab" despite enormous pressure. Keep this uppermost in your mind and decision making.

▲ 4 ▼ Reply ↩

Dr Prepper 3 days ago

the WHO really, really sucks.

My family has its own experience with WHO guidance to doctors, which provides doctors with "global standards" which enable the doctors to disengage their brains.

As long as a doctor follows "WHO guidelines," he or she has basic protection against malpractice suits, so why bother to exert oneself on behalf of the patient?

Modern medicine is perfectly happy to have lifetime patients and the doctor's main source of income is pushing pills and shots. If the pills make the patient worse, there are other pills to "counter" the side effects.

Eventually they get these patients (especially the elderly) taking in so much medicine that it is a wonder they are alive at all.

ANY medicine taken for a period over a couple weeks has a potential toxicity, and taking multiple medications over time is a recipe for disaster - and still, overmedication is commonplace today.

I always wondered as a child how people of past periods of history could be so harsh and intolerant. The answer is that when you see evil and unbearable suffering on a mass scale, BS tolerance goes to zero.

At this moment, the ease of living and indulgence has dulled most people's spiritual senses and left them vulnerable to mass hypnosis. Many, many are unlikely to survive even modest hardships.

 **For the 9,999th time. TRIALS FOR 'CRIMES AGAINST HUMANITY' please.**

The Nuremberg Code 1947 Permissible Medical Experiments

The great weight of the evidence before us to effect that certain types of medical **experiments** on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human **experimentation** justify their views on the basis that such **experiments** yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should

have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the **experimental** subject there should be made known to him the nature, duration, and purpose of the **experiment**; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the **experiment**.

2. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the **experiment**. It is a personal duty and responsibility which may not be delegated to another with impunity.

3. The **experiment** should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

4. The **experiment** should be so designed and based on the results of animal **experimentation** and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the **experiment**.

5. The **experiment** should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

6. No **experiment** should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those **experiments** where the **experimental** physicians also serve as subjects.

7. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the **experiment**.

8. Proper preparations should be made and adequate facilities provided to protect the **experimental** subject against even remote possibilities of injury, disability or death.

9. The **experiment** should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the **experiment** of those who conduct or engage in the **experiment**.

10. During the course of the **experiment** the human subject should be at liberty to bring the **experiment** to an end if he has reached the physical or mental state where continuation of the **experiment** seems to him to be impossible.

11. During the course of the **experiment** the scientist in charge must be prepared to terminate the **experiment** at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the **experiment** is likely to result in injury, disability, or death to the **experimental** subject.

I tried to be open minded and give some benefit of the doubt to the people at the top of this health debacle. But it became impossible when the vaccine companies unblinded their trials 18 months early and vaccinated the placebo groups - just as the vaccines began wearing off and the risk of antibody dependent enhanced disease was increasing.

They made sure that nobody will ever see any safety data beyond 6 months.

Forget about the damn vaccine. The people responsible for creating this virus need to pay. They need to pay dearly and publicly. Or else what are we doing here? How can we discourage governments worldwide from investing in Gain of function research???

It needs to be big and public or else we are no better than a fictional socialist dystopia.

▲ 3 ▼ Reply ↩

Sparehead 4 days ago

Okay, we agree on that, but I still don't understand why we wouldn't be focused on the "vaccine" when that was clearly the point of the plandemic, and is currently being pushed hard on the public, including children.

▲ 1 ▼ Reply ↩

Lou Saynis 4 days ago

I'd like to see the people responsible for gain of function research, that led to KNOWINGLY creating a dangerous infectious agent, **be publicly held responsible**. If they are not and the masterminds of this doomsday device are allowed to vanish behind a veil of bureaucracy... then it will result in all global powers engaging in an arms race similar to nuclear weapons in the 20th century.

The difference is, a significant degree of action is required to fire off a nuke where a virus can be accidently or intentionally released with a much larger blast radius and much more difficult to identify the source. There must be consequences for Covid19.

The reason the vaccine is a different subject is that a large portion of the civilized world have already been inoculated. The consequences of that will be apparent in all of our lifetimes and it's too early to start blaming people for it's known faults.

▲ 1 ▼ Reply ↩

Sparehead 4 days ago

I want that as well, but the veil of bureaucracy is already in place and is currently pushing to vax the entire world. As you point out the consequences of being vaxxed will become apparent in time. I'd add in time there will be accountability for the psychopath globalist cabal (which may well extend to their families). They will ultimately fail, just like every attempt through history to impose a command economy and a totalitarian society. Vaxxing everyone is part of their plan and that's what is currently in play. I expect the fewer that get vaxxed the sooner their plan fails.

Most governments are totally corrupt and owned by the likes of Bill Gates and Klaus Schwab's WEF "Great Reset". They all ran around using the same "build back better" slogan because they were all in on the plan to break the Western world, rather than let the sovereign debt defaults occur organically. We should be heading into a period of civil unrest and political upheaval, and I doubt there will be any meaningful accountability of guilty parties until after that period.

" Low-certainty evidence found that ivermectin prophylaxis reduced COVID-19 infection by an average 86% (95% confidence interval 79%–91%).

--

Conclusions:

Moderate-certainty evidence finds that large reductions in COVID-19 deaths are possible using ivermectin. Using ivermectin early in the clinical course may reduce numbers progressing to severe disease. The apparent safety and low cost suggest that ivermectin is likely to have a significant impact on the SARS-CoV-2 pandemic globally."

What the real "bioweapon" is humans experimenting on humans, live human "gain of function" "spike" gene therapy "vaccine" experimentation clear and present public danger, under false pretenses without accurate and complete informed consent, for private profit and tyrannical control, with zero "media" inquiry!

Where is the direct 100% matched evidence empirically compiled by 5 independent, non big government non big corp/pharma to gold standard scientific method(s): a) of asserted "Covid-19" "virus" captured, isolated, replicated, purified and observed real-time, as an external biological causation agent to any of asserted Big Gov Big Corp/Pharma"COVID-19" symptomatology, presenting within humans?

Where is the evidence empirically compiled by 5 independent, non big government non big corp/pharma to gold standard scientific method(s) of the "virus" "test" procedure(s), methodology(s) and theory(s) supporting said "tests" and "solutions"?

- a) We know the **"COVID" tests are: suspect, falsifiable and inapplicable for use** as claimed by US Gov Big Corp/Pharma assertions; and
- b) We know the **"COVID" "vaccines" are: suspect, falsifiable and inapplicable for use** as claimed US Gov Big Corp/Pharma assertions; and
- c) As both "tests" and "vaccines" are suspect, inapplicable and falsifiable, what is "COVID," just what exactly is "Operation Warp Speed"?

From the aforementioned and more: There is no 100% direct evidence match(s) beyond a reasonable doubt, of an external biological pathogenic causation agent. Zero.

If the predictions are correct, most people will begin dying off in 3-5 years. Think about this. A large portion of the adults will be dead. Who will raise their kids? The answer is the state will raise them.

They don't want the children to get it because they are going to use those manipulated young minds as their slaves and their new workforce. The genocide will wipe away all the "old ideas" and only leave young fresh minds that can be easily manipulated... especially after they watch their parents, aunts, uncles, grandparents, teachers, etc all die off.

The elites know they will have blank slates with these kids. They want them around so they can "build" their new society on their terms. Call it a "great reset" if you will.

Vaccine companies are always shielded from lawsuits. If your kid dies or is disabled from the MMR (it does happen), you have to apply to the government for compensation. The risks are well know and considered acceptable for public health. If your kid is among the unlucky ones, well, you must bear that burden and thank you for your service to the cause of public health.

You do realize our founders had no check and balance against the National/State Government(s) performing eugenic medical/science theory fraud experimentation upon the people, under criminal false pretenses for private profit and control, **except one.**

There is no Court or law enforcement/cops coming to halt these crimes against Americans/humanity.

*If the representatives of the people betray their constituents, there is then no resource left but in the exertion of that original right of self-defense which is paramount to all positive forms of government, and which against the usurpations of the national rulers, may be exerted with infinitely better prospect of success than against those of the rulers of an individual state. In a single state, if the persons intrusted with supreme power become usurpers, the different parcels, subdivisions, or districts of which it consists, having no distinct government in each, can take no regular measures for defense. **The citizens must rush tumultuously to arms, without concert, without system, without resource; except in their courage and despair. On Friday, Italy halted the administration of the killer vaccine for those under the age of 60. The decision followed the death of a perfectly healthy 18-year-old named Camilla Canepa, who died last week of blood clotting and a brain hemorrhage after receiving the vaccine shot on the 25th of May.

It really should be left up to individual countries as well as individual households to make these decisions. It's really none of the WHO's business. It is way beyond scope for what their mission should be.

Maybe the WHO should focus more on fostering international cooperation and serving as a clearinghouse for information and guidance to governments and medical sectors.

It's really up to families and their physicians to make a determination as to what they think best and suited to their children and patients.

The UN WHO shouldn't be stirring up trouble by telling people not to wear masks one day and then recommending they should the very next day. Telling people this or that or the other on any given day.

The inventor of the mRNA shots is coming out hard against this. I am sure he will be censored and eventually die in a helicopter crash or something.

But to your point on Nuremberg-style trials. For that, you need a functioning government that is against the other side. In WWII, we had the Axis and the Allies. But today, we literally have a united front of governments against the common man.

The common man's justice is either in the ballot box or the cartridge box (and they eliminated one of those options recently).

Marx did the same.

When science ceases to become a verb and is only a noun, they will morph it to be a reason for politicians to act how they want.

Science is supposed to be an action. "I engaged in science when I followed the *scientific method* to come to my conclusions. I observed, hypothesized, predicted, experimented, reached conclusions, and repeated the procedure".

To ever say "science is settled" is to deny what the act of engaging in science is. To be engaged in science is to always question.

On the other hand, to engage in state worship is to never question.

Ask yourself, is a good chunk of the population engaged in "science" or are they engaged in "state worship"?

The WHO says, "there's not enough evidence on the use of vaccines against Covid in children."

NEWS ALERT : there's not enough evidence on the use of this experimental mRNA vaccine against Covid for anyone, it's an experimental vaccine...!!

There have been many attempts and scientific trials to use mRNA vaccines over the past 20 years... In every animal study, the animals that were given the mRNA vaccine were fine until the test animal came in contact with a new coronavirus... When the lab animals (like those humans taking this vaccine presently) were infected with a new strain of coronavirus they died...!!

Basically the vaccine caused a cytokine storm, where the immune reaction to a common virus is so strong that it attacks the body and the vital organs causing death.

This information has been known for decades... If you took the vaccine you should be talking with attorneys and preparing a lawsuit for those who misssguided you for nefarious reasons

The BIG red flag is that the spike protein did NOT stay in place in the deltoid muscle as planned but has migrated to organs in the body. One of the primary features of intelligent life is the ability to detect patterns and develop appropriate responses to those patterns. I am wondering what our immune systems are going to think of spike proteins popping up all over the body? Under any number of scenarios, what is the immune system going to do? That's the \$64 million dollar question. Remember - this stuff is EXPERIMENTAL...!

¹⁷ Fear, and the pit, and the snare, are upon thee, O inhabitant of the earth.

¹⁸ And it shall come to pass, that he who fleeth from the noise of the fear shall fall into the pit; and he that cometh up out of the midst of the pit shall be taken in the snare: for the windows from on high are open, and the foundations of the earth do shake.

¹⁹ The earth is utterly broken down, the earth is clean dissolved, the earth is moved exceedingly.

²⁰ The earth shall reel to and fro like a drunkard, and shall be removed like a cottage; and the transgression thereof shall be heavy upon it; and it shall fall, and not rise again.

²¹ And it shall come to pass in that day, that the Lord shall punish the host of the high ones that are on high, and the kings of the earth upon the earth.

²² And they shall be gathered together, as prisoners are gathered in the pit, and shall be shut up in the prison, and after many days shall they be visited.

²³ Then the moon shall be confounded, and the sun ashamed, when the Lord of hosts shall reign in mount Zion, and in Jerusalem, and before his ancients gloriously.

A lot of diabetes is autoimmune too. The immune system being taught how to attack the pancreas.

There are 100 different autoimmune diseases cataloged now.

<https://www.aarda.org/diseaselist/>

For decades, doctors and researchers believed that type 2 diabetes was a [metabolic disorder](#). This type of disorder occurs when your body's natural chemical processes don't work properly.

Recent research suggests that [type 2 diabetes](#) may actually be an [autoimmune disease](#). If that's the case, new treatments and preventive measures may be developed to treat this condition.....

Lada is autoimmune too

Latent Autoimmune Diabetes in Adults (LADA), although formally classified as Type 1 Diabetes (T1D), very often (at least in Western countries) appear clinically with Type 2 Diabetes (T2D)-like features as overweight and insulin resistance. LADA patients do not need exogenous insulin at the time they are diagnosed with diabetes, but a large percentage will within a few years develop need for such treatment.....

And we have to quote Wilford Beimley "DIABETUS!"

My theory is that diabetes is mainly caused by manufactured fats and oils. Formerly, the main fats and oils used in cooking were lard, butter, tallow, and olive oil. No vegetable oil, canola oil, or Crisco. Insulin resistance is a condition in which insulin is unable to "unlock" the lipid layer of the cell membrane to enable the glucose in the blood to enter the cell to provide energy. Sugar can't get into the cells and remains in the blood. I think this is probably because the body cannot use these artificial oils to build cell membranes that function correctly.

In *Twain's Life on the Mississippi*, he tells the story of a couple of steamboat passengers discussing how cottonseed oil could be colored and processed, and sold as olive oil, and how you could make a lot of money doing that. This kind of thing, while not common in the 1800s, goes way back.

Where is President Donald "Warp Speed" Vaccine Trump? Shouldn't he be warning Americans?

The sad thing is, Trump & Melania's son Barron is on the Autism spectrum and I'm sure he was damn aware of the dangers of non-covid vaccines with their neurotoxic elements like Aluminum & Mercury as well as fetus parts, etc.. For him to approve inflicting the vaccines on Americans shows he is one of the cabal. If you think he was deceived while president, there is no excuse for him not knowing the dangers of the vaccines now.

Trump is not interested in protecting people but he is distracting Americans from this nightmare by campaigning on election fraud. Trump is a fraud and he needs to be denounced so we can find a real leader. I'm a conservative and I was a strong Trump supporter, but not now. RFK, Jr who runs Children's Defense has been fighting big pharma, MSM, the elites like Gates, & the evil chemical companies poisoning our crops for years. In Trump's defense, he resisted calls for making the vaccine mandatory and promoted therapeutics, leaving decisions up to Americans themselves. When he was president, data was just coming in about how lethal (or not) covid would prove so condemning anything that the scientists recommended would have been ridiculous. He had a lot of faults, one of the worst of which was choosing horrifically bad people to "support" his administration.

At one point, he considered Kennedy Jr to head up a vaccine task force, but then apparently took Gate's advice to nix that. SO MANY lost opportunities.

Have been thinking of how to negate the mRNA vaccine if forced to take it.

It cannot be stopped from entering cells as it uses lipid encapsulated dumping.

The mRNA production will cause inflammation, and that increases blood flow to the area of the injection, and leads to spread of toxic particles around the body and random side effects.

So the best thing you could do is

1. reduce the inflammatory response as much as possible
2. reduce your metabolic output as much as possible, ie reduce cell activity

This would mean taking anti inflammatory things like Aspirin in safe amounts; and large doses of MSM powder during the day every day at a tolerable level. MSM also protects liver. Also Melatonin dosing to help feel tired in the evenings, thus less active, and sleeping longer.

Basically you try to shut down your system as much as possible, lower your metabolic demand on cells, thus less cell metabolism and energy demand, thus reduce lipid intake as well. And cut inflammatory response to help halt toxin spread.

I'm not sure if those other supplements can help, as the mRNA produce protein particle not the spike protein in total, so they say. Anyway cannot hurt to also take licorice root teas, celery seed extract, green tea extract, ivermectin, berberine, NAC, R-Lipoic Acid, nicotine patch, quercetin, ursolic acid (holy basil), milk thistle, bromhexine cough syrup.

May as well do the whole thing for the week or two after a vaccine shot.

Why take the shot in the 1st place? Instead of taking the shot then taking all sorts of things, just don't take the shot.

Id rather forge a vaxx card then do all that. It's just a GD piece of paper, to quote W. And they've machine gunned the vaxx rollout. Records are gonna suck for who got the shot. Forging one will be easy.

Only thing that would help if you do get the shot would be anti-rejection meds given for organ transplants. Which themselves are highly dangerous.

Just don't get the shot.

A Brief Respite?

The plague caused by the Wuhan-virus has not run its course, yet. Could we be in the eye of a biological hurricane? We don't know. We do know that new variants are becoming more virulent and resistant to the current vaccines ... an ominous trend.

If in the eye, what will characterize the back-half? We don't know.

Meanwhile, Americans are rejoicing as though it is a certainty that the plague has run its course. Understandable. Any relief from the aversive context amplified by egregious political missteps of the past year is welcome. Besides, maybe the plague has run its course in these United States, at least. We don't know.

What, however, if we really are just enjoying a brief respite? What might we be facing? Perhaps, we best temper our joy with a bit of humility.

We should be watching what is allegedly going on in India close. If they drop the virus the vaccine was priming for it would be a likely target to start it. Too many people in India and many live in ignorance and abject poverty. Globalists are totally going to be after them.

Remember, the lab animals died when they were exposed to the virus the vaccine was designed for. Inflammation cytokine storm... If they started dropping it repeatedly in India it would spread here by fall. They of course would also likely just drop it here when they felt like it, no need to hope it spreads. Last time it started in Washington state.

Indians reported that either things were completely normal, the propaganda overblown, or that there were TB outbreaks (due to the unsanitary conditions and abject poverty). India is notorious for corruption on all levels. Hospitals put healthy beggars in the beds for a couple bucks, then kicked them out when a real patient was waving wads of cash around.

Has WHO now officially acknowledge the "Delta" variant or not? The UK strain had a link to Kent, Porton Down. Was called "Kent" variant at first. U of Kent and PD have a tradition of sharing labs and research.

Whatever it is, the narrative still has some life left. They will push "Delta" into fall / winter before using "climate change" as the next excuse to curb our lifestyles. Neil Ferguson wrote a roadmap, which spelled out the next steps. Was "leaked" a week ago and very similar to the Canada "leaks" from October.

If there is a second wave then providing the nasal vaccine to children may make some sense at that time. In the interim it should be at the determination and discretion of the parents and physician. It's the parents decision on the advice et guidance of a physician. Children can carry a higher viral load in their respiratory system than adults thus the nasal vaccine may be more suitable to that situ. Nasal vaccines should be made available for physicians to provide as part of possible a treatment regimen for children ASAP even on a waiver basis if there's an upwelling/outbreaks in the fall 21 winter 21-22 prior to determination of a second wave or early in any second wave onset. Perhaps some sample nasal vaccines may even be secured early from the Mexican Nasal Vaccine program as such appear to be the furthest along in development & testing for use as an emergency stockpile.

▲ 1 ▼ 1 Reply ↩

Max21c 3 days ago (Edited)

Some countries for example Germany claim that an increase in infected persons indicates a wave. Germany is now claiming they are in their third wave and nearing a fourth wave. It may be true that Germany may be on their 3rd or 4th outbreak such which they are terming a wave.

There has been a single or first wave as the virus has swept across the globe and spread significantly. The virus rises in terms of the number of persons infected then subsides then returns in an upwelling of newly infected persons or an outbreak.

If there is a second wave and hopefully there shall not be a second wave, but, if there is a second wave there is some reason to believe it shall come from new variants and strains that are faster to infect & sicken people as well as more powerful than that which we have see so far or more able to sicken people enough that they shall seek medical care from a doctor or clinic or be hospitalized for treatment or in some circumstances succumb or die from the virus and its complications.

As it stands now things appear to still be in the first wave as the virus has swept across the globe and there are sporadic to intermittent outbreaks or upwellings of the virus and increased rates of spread or infection from time to time in different nations and among different populations.

There does not appear to be distinct waves within the first wave or initial spread of the virus. These are outbreaks or upwellings within the first wave rather than individual waves.

Hopefully for you and your family's sake the virus shall pass you by and you'll go unscathed by it and for all of our sake no second wave shall come of it.

Good luck!

Rotate orgonite. Orgonite is made of materials that are conducive to producing friendly waves IF it is being rotated. Those waves do a body good because we are exposed to so many harmful pulsed waves these days. As stationary objects orgonite doesn't do a lot. Most people don't notice that they do anything when they are not moving.

The materials in orgonite could be used to make an old fashioned radio, to give you an idea of the potential. It was Nikola Tesla who used rotation to turn nonelectric rivers into hydro electric plants. By putting orgonite on record players or vertical fans, it makes waves that help to neutralize the harmful waves.

Bad Thinkers

Why do some people believe conspiracy theories? It's not just who or what they know. It's a matter of intellectual character.

You say that he dismisses the official account of 9/11 because he is closed-minded; he accuses you of closed-mindedness for refusing to take conspiracy theories seriously. If we are often blind to our own intellectual vices then who are we to accuse Oliver of failing to realise that he believes his theories only because he is gullible?

What if Oliver is too far gone and can't change his ways even if he wanted to? Like other bad habits, intellectual bad habits can be too deeply entrenched to change. This means living with their consequences. Trying to reason with people who are obstinately closed-minded, dogmatic or prejudiced is unlikely to be effective. The only remedy in such cases is to try to mitigate the harm their vices do to themselves and to others.

The quotes from the article are from Aeon - probably won't link here - no reason to give his theories activity - but this is what is now circling.

I think they are in a hot seat now since the CDC convoke an emergency meeting (June 23th, now I think) on young people having heart problems after ze va\$\$ine. Not that the CDC is more reliable but they can't mask forever the growing cases dumping at their feet. I can't wait to see with what they come up with.

In Europe, they are again talking with fear about a pandemic. Indian strain Covid-19 (B.1.617.2) or "Delta". He first completely supplanted the old "colleague" and captured the United Kingdom, then became dominant in Portugal, where the British like to rest and where he is present in 96% of cases of new infections. The outbreaks of the "Indian" pandemic are growing in Germany, France, Spain and other European countries. According to the Financial Times (FT), the Delta mutant is responsible for more than 20% of infections in Italy and approximately 16% in Belgium. It is still relatively small on the scale of the entire continent, but very quickly it captures new victims.

Europeans are again in a hurry to rejoice at the successes in the fight against the insidious virus. The new mutant is much more infectious and more dangerous.

“No matter what you read on news aggregators like Google and Yahoo, this is the real situation in India.”

Staged Drama in India

In a letter to Culture Wars from Diva Garg of India, he writes (excerpts):

...Chaitra (spring) is the season when the weather changes in India...Due to the microorganisms present in the air and rising temperatures, people normally find it difficult to breathe during the season because the colds they contract cause respiratory problems. **Chaitra is also the season when many Indians succumb to diseases like typhoid, malaria and dengue fever.**

However, that did not happen in 2020 or 2021 because all the diseases associated with this time of year were diagnosed as COVID. ...

India is a country where two-thirds of the population lives in poverty (68.8%). When the immune systems of those malnourished people incur further stress because of a “vaccine” which commandeers their DNA, is it surprising that death follows as the obvious consequence? **Yet, while almost anything can be reworked as COVID, the same media which are playing up the danger of the virus are simultaneously playing down the dangers of the vaccine.**

THE middle class (28%) and upper middle class (3%) population, of India who are glued to the TV, have been brainwashed to get themselves and everyone around them vaccinated. **The low wage drivers, cooks, cleaners, and nannies are being forced**

to get vaccinated to keep their jobs, and their already weakened bodies are unable to take the stress the vaccine is causing, causing them to have to choose between losing their job or losing their lives. To add to this, the producer of COVOSHIELD, India's domestically produced vaccine, has fled the country and is living in London because he is getting death threats to force him to increase production and deliver vaccines to those with money and influence.

Corruption has reached the stage where you need to be politically connected to get a patient admitted to a hospital, where common medicines are being sold on the black market for exorbitant prices, and oxygen cylinders are being hoarded. Politicians, media moguls, pharmaceutical firms and hospitals are exploiting this tragic situation for their own benefit. Even Hindu priests are cutting deals with ambulance drivers for cremating bodies. Recovered Covid-19 patients are selling their plasma for three bottles of whisky...

...the blame lies with the government and media for creating this state of panic in a country where no one now knows if all these deaths are due to COVID-19 or its variant. Because no one knows the name of the disease, no one knows the cure, and everyone is being treated like guinea pigs. The vaccine success rate is unknown, **but we actually do know that people are actually dying due to job losses, and that 7.35 million Indians lost their jobs in April alone. Those lucky enough still to be employed are taking home half of what they earned in 2020....**

Of course, safe and effective to them means that the people will not revolt, so it is safe for THEM, and it will kill a lot of the victims which means it is effective for their genocide...

KJV. Genesis 6:1-8," And it came to pass, when men began to multiply on the face of the earth, and daughters were born unto them, That the sons of God saw the daughters of men that they were fair; and they took them wives of all which they chose, And the Lord said, My spirit shall not always strive with man, for he is also flesh: yet his days shall be an hundred and twenty years. There were giants in the earth in those days; and also after that, when the sons of God came in unto the daughters of men, and they bare children to them, the same became mighty men which were of old, men of renown. And God saw that the wickedness of man was great in the earth, and that every imagination of his heart was only evil continually. And it repented the Lord that he had made man on the earth, and it grieved him at his heart. And the Lord said, I will destroy man whom I have created from the face of the earth; both man, and beast, and the creeping thing, and the fowls of the air; for it repented me that I have made them."

The sons of God is referring to fallen angels,(see Book of Job). The fallen angels mated with human beings. Angels don't have the same DNA/RNA as humans. So the children were born with altered RNA make- up. These fallen angels were followers of Satan). Connecting the dots, are we seeing another attempt to alter Gods creation through RNA injections by again followers of Satan?

▲ ▼ Reply ↩

Free2Speak 3 days ago

The identity of the " Sons of God" is not clear. It may refer to Seth's line, which wrongly intermarried with the daughters of Cain. In any case, angels are spirit, not flesh, they don't have DNA and therefore cannot procreate. That man can procreate is one of the reasons that Satan hates us so much.

▲ ▼ 1 Reply ↩

IRMAD 3 days ago *(Edited)*

Job 1:6, “ Now there was a day when the sons of God came to present themselves before the Lord, and Satan came also among them”. Which means they presented themselves in the glory of heaven. Not possible for Seth’s lineage as humans

Jude 1:6, “ And the angels which kept not their first estate, but left their first habitation...”. They came to earth.

Colossians 1:16, “ For by Him were all things created, that are in heaven, and that are in earth, visible and invisible... “.

Angels were created. Everything created has DNA/RNA.

Except these new vaccines are experimental and only now undergoing large-scale testing under coercive conditions.

Vaccinate your kids at THEIR risk.. and if anything happens to them, IT'S ON YOU, mom and dad. Because YOU made the choice to inject your kids with some experimental shit, just so you could get on a plane with them.

In the official study for 12-15 year olds, it was reported that 0.4% of the kids had "serious" adverse effects. That's 4 kids out of 1000, when there probably wouldn't even be one kid out of 1000 with a moderate version of the illness.

Of course Pfizer determined that none of the serious effects were related, except for lymphadomy (?)

The thing is, one of the kids, a 12 year old girl named Maddie, is in constant pain and paralyzed in both legs and one arm. She can't keep food down either. In the study, she is reported as having neuralgia, constipation and depression.

Here's Pfizer's safety info, scroll down to page 20 or so. The quote below is from page 27.

<https://www.fda.gov/media/144413/download>

"Serious adverse events from Dose 1 through up to 30 days after Dose 2 in ongoing follow-up were reported by 0.4% of Pfizer-BioNTech COVID-19 Vaccine recipients and by 0.1% of placebo recipients. There were no notable patterns or numerical imbalances between treatment groups for specific categories of serious adverse events that would suggest a causal relationship to Pfizer-BioNTech COVID-19 Vaccine."

It's the new thing. Everywhere you go they are talking about the jabs and how their arms hurt etc. It's the new craze. PR took over.

I haven't had a text for a while since I got the Indian variant scare text. Maybe some in the NHS getting second thoughts after they have harassed millions into getting it.

Going for all the over 18 year olds before July 19th. That's why they extended it.

FALSE: Regarding, "There is not yet enough evidence on the use of vaccines against COVID-19 in children (Adults as well) to make recommendations for children to be vaccinated against COVID-19." The inclusion of hidden properties including the toxic spike protein is "DEFINITIVE", VERY HARMFUL! Take Ivermectin and/or hydroxychloroquine. The eugenics initiative is well under way with the spike cocktails. Hook, line, sinker, game, set, match. Get the SPIKE right up your ass! Do not be part of the global depopulation movement.

By Design!... Because when Bill Gates isn't screwing underage girls... He is thinking about the dream possibilities of trafficking them as slaves for organ harvesting among other practical uses... and getting the IQ quotient as high as he possibly can by "thinning the herd"

What will those warped and fucked up Malthusians think up next!?

As you imply or suggest "feudal" which is correct. But that was before the "rights of man" and the U.S. Constitution that evolved to make us modern free thinking and independent. So that g0yim Lord Gates would respect our "inalienable rights" so that he "one day" wouldn't one day be drawn and quartered for his contributions to crimes against humanity like eugenics and engaging in sexual depravity with under age children being trafficked by his Jewish overlords!...

All concerned should have been up front about the experimental nature of the not-vaxx. Instead of this, our idiotic politicians give incentives to take the poison!

They have abandoned the Hippocratic Oath to "first do no harm".

It is now "first monetize the 'solution'"

People are supposed to be paid to be in trials and given all possible complications up front. Things are different now.

It MUST be because they want millions dead. What other outcome is there?

▲ ▼ Reply ↩
