

Wayne Allyn Root delivers five minutes of truth bombs – UK rate of all-cause child mortality goes from 6 per 100,000 unvaxxed to 97 for double dosed and 289 for triple dosed kids

The staggering numbers that leaped out at me are these:

- All cause mortality for unvaccinated children in the UK is 6 per 100,000.
- Double vaxxed all cause mortality rate for UK children is 97 per 100,000 (more than 16 times higher)
- Triple dosed all cause mortality rate for UK children increases to 289 per 100,000 (more than 48 times higher than for unvaccinated children).

These are horrifying numbers and, if the same numbers are true for the US, means that the experts at the CDC/FDA voted 15-0 to approve injections down to babies of 6 months old with these harms prevalent.

Here is a summary of the 3:50 minute video. Presumably the statistics cited can be referenced.

He quotes Dr Peter McCullough's data that child deaths per million used to occur at a rate of 4 per million – and now it's a daily occurrence (there is no reference to the rate per million in the last year or so since injection roll-out).

Research out of Switzerland shows that every person “vaccinated” with C19 injections has some form of heart damage (ranging from minor to major).

EU adverse event reports show injuries for every age group. Excess deaths are up 193,000 over prior years, so far in 2022. Increased deaths in children occurred as soon as the C19 injections were conditionally approved.

In the UK, excess deaths are amongst the lowest in the “unvaccinated” in every age group. Excess deaths are the highest amongst those injected with C19 “vaccines”. The UK's Office for National Statistics (ONS) figures show deaths amongst unvaccinated children are 0.31 per 100,000 – deaths for one dosed children, the rate is 3.24 per 100,000 (more than ten times higher) and if triple dosed the rate is 41.29 per 100,000 (140 times the rate of an uninjected child).

All cause mortality for children in the UK, unvaccinated children is 6 per 100,000 – double vaxxed all cause mortality rate is 97 per 100,000 (more than 16 times higher) – triple dosed all cause mortality rate for children increases to 289 per 100,000 (more than 48 times higher than for unvaccinated children).

It is the same pattern in the UK for every age group.

“This is MASS MURDER.”

Here is an article I posted on 5 October 2022 referencing a Expose-New.com.

Breaks my heart. How can so many people continue to let these atrocities carry on. The people that are suppose to protect us are killing us.

It'll be interesting to see how many stupid and lazy parents are out there willing to kill their children because they can't be bothered to keep their children home and raise them properly in a safe environment. Calling a spade a spade.
