What the data tells us

A 52-slide deck presented at the FLCCC conference in Florida on Oct 15, 2022 summarizing some of the most important statistics for the vaccines on safety and efficacy. It got a standing ovation.

Oh the irony----

The younger you are, the less deadly C19 is.

While at the same time (according to Steve's deck), the younger you are, the more deadly the C-19 shot is.

So why, oh why, are they putting this thing on the childhood vaccine schedule??

Dr. Marian Laderoute Writes HERV-K102 and Pandemic Responses Oct 20

It can be (UNDER) estimated from the ONS data released July 6 2022 that in the USA there would have been at least 536,000 EXCESS vaccination associated non-C19 deaths (based only on 2 doses and for 65+ the number of USA who received two doses =50.9 million see [USAFacts.org](#)). ie for 65+ who received two doses. Many people received 3 doses where the non-C19 death rate was much higher. Also the highest number of non-C19 deaths were in the one dose only category. It is clear the pandemic has turned into one of vaccine induced injuries and deaths.

Bhakdi/Burkhardt pathology results show 93% of people who died after being vaccinated were killed by the vaccine

The vaccine was implicated in 93% of the deaths in the patients they examined. What's troubling is the coroner didn't implicate the vaccine in any of...
