"Go ahead little Johnny, it is a very rare side effect of the vaccine."

"But doc, there are literally no cases of people my age dying from COVID unless they had cancer or something really serious to begin with."

"What, are you some kind of Trump nut?"

"No, don't even like the guy. And he's actually pushing for the vaccine so saying I'm a Trump nut if I don't want to be vaccinated doesn't even make sense."

"Shut up Trumptard and take the vaccine. I'm a doctor and I am science."

Be sure to take MSM, especially TV, out of your diet, for greater resistance to coronavagueness.

W.H.O. AND C.D.C. – THE NEW NUREMBERG TRIALS 2021 [CRIMES AGAINST HUMANITY]

"A team of over 1,000 lawyers and over 10,000 medical experts lead by Dr. Reiner Fullmich have begun legal proceedings over the CDC, WHO, the Davos Group for crimes against humanity. Fullmich and his team present the faulty PCR test and the order for doctors to label any comorbidity death as a Covid death as fraud. The PCR test was never designed to detect pathogens and is 100% faulty at 35 cycles. All the PCR tests issued by the CDC are rated at 37 to 45 cycles. The CDC admits that any test over 28 cycles are not admissible for any positive reliable result. This alone invalidates over 90% of the alleged covid infections tracked by the use of this faulty test." READ REST: <https://blazingpress.com/w-h-o-and-c-d-c-the-new-nuremberg-trials-2021-crimes-against-humanity-please-share-this-info/>

Hey, CDC? Check this, too: [Florida Urologist Finds Signs of Infertility & Prostate Cancer in Men Jabbed With Covid Vaccines](#)

Serve your Raytheon, er, ah, I mean, country, suckers: [Biden's Military Puts West Point Cadets in Solitary Confinement If They Refuse Covid Vaccine](#) . . . way to off soldiers before they even deploy, strategists.

Bacon's Rebellion 10 hours ago *(Edited)*

Liberal dope I unfortunately know...

"Trusts the Science"....Proud to boast about being "fully vaccinated"...no big deal, didn't die in the chair...now he's safe from the Covid boogey-man.

...a month later he develops tinnitus...doctors stumped...no hearing issues the previous 60 years....it went away on it's own.

He wakes up a few weeks later deaf in one ear...they inject something (steroids?)...doesn't help...he has severe loss in that ear and it appears to be permanent...doctors chalked it up to bad luck and old age...yeah, right.

April 26, 2021

At least 1,500 people have so far complained to the MHRA, through its yellow-card system for reporting feared side-effects, that they have developed tinnitus, ringing in the ears, after their jab.

The British Tinnitus Association (BTA) says the yellow-card reports do not prove vaccines are to blame

[Lies, lies, lies...](#)

▲ 26 ▼ Reply ↩

truth or go home 10 hours ago

This is another limited hangout.

You think maybe 5,000 people dead is more important than 100s with heart inflammation?

The CDC has no interest in reviewing the safety of the vaccines - otherwise they would have shut it down after the first 500 deaths.

Maybe after the nurse on TV died in the first week.

Yeah their emergency meeting is probably to discuss how they are going to spin the next generation of adverse reactions in kids - they sure aren't going to put the brakes on this thing...

▲ 43 ▼

Gloobus Floobus 8 hours ago

Oh, his "doctors" know damn well it was the vaxxx.

Unfortunately, far too many "doctors" these days are basically psychopaths.

After hearing about vaxxxine side effects in one of their patients, they probably have to suppress their true urge:

<https://www.youtube.com/watch?v=kdOPBP9vuZA>

▲ 13 ▼ 1

Mister E 5 hours ago

they inject something

what, in his ear? Was it long and yellow, like a banana?

typical modern medicine: "hmm... this is a tough one... not sure what it might be... here's an injection. And take these pills and be sure to come back for more treatment if this doesn't fix it."

▲ 2 ▼

Hiros Edge 4 hours ago

I had the real covid last fall, a pretty serious case (but did not go to the hospital). Developed tinnitus and other hearing issues 40 days after the other symptoms subsided.

There are lots of reports and studies out there concerning covid/vax and tinnitus. And the number of articles online increases every week.

From what I've read, the cilia in cochlea are sensitive to reduced blood flow and blood oxygen levels. These tiny hairs become damaged and/or die off, resulting in hearing damage. Tinnitus is now being considered more of a neurological issue, where the brain tries to fill in the blanks of missing sound frequencies. The aural equivalent of 'phantom limbs' among amputees.

The former CEO of Texas Roadhouse committed suicide in light of struggling with the constant ringing following his bout with covid.

▲ 7 ▼

Roacheforque 8 hours ago (Edited)

Not really interested in hearing from "the vaccinated". They have a bad decision to psychologically justify and therefore cannot be rational (as they weren't when they agreed to the experiment). As for the CDC's emergency meeting, it's called "damage control".

But if the Nuremberg 2021 legal proceeding is real, it's the first good news I've heard this year. Someone said that the Nazi hangings were only effected due to the actual "outcome of war and defeat" of Germany. I would argue that we are in a 5th generation war with the climate alarmist/activist movement and the sociopathic class of exploiters who want to depopulate planet earth through mass vaccination extermination.

The Dr. Yeadon video is very forthcoming and this was a former Pfizer VP who states in detail everything I have aggregated to connect the dots. I can't connect to the bitchute, probably under a ddos attack.

Sadly, I have MANY close friends who will suffer and die within two years, and nothing that results from any legal action against the criminal sociopaths will bring them back.

In the end, they will argue that they had to kill some people to save the planet, and that saving the planet is an end that is justified by any means.

Obviously, I beg to differ ...

▲ 15 ▼ Reply ↩

I have idiot family members who got their kids the shots. I've provided tons of information about the scamdemic and dangers of the mRNA and adenovirus shots from legit medical journals

▲ 25 ▼

truth or go home 4 hours ago

I've tried to convince others to be cautious about the shot, mostly to no avail.

If they watch the media, there is no way you can overcome the onslaught of 24/7 propoganda they've been subjected to. If they don't, then you have a chance.

The moment I saw the nurse faint on live TV after getting the shot - on December 17th, and she was nowhere to be found afterward, except pictures with a body double, then I knew this thing was terrible. That should have been enough to shut it down right there.

Now I read a lot here about it being a "kill shot" and "spike proteins" and all that. I don't have enough personal knowledge to be able to determine if any of that is true. I don't want to be a chicken little and predict things I don't know about, and I'm not vindictive enough to wish any of that on anyone(except maybe those who've perpetrated this thing).

I know firsthand one fairly healthy older person who was sick from 15 minutes after she took the shot until she died 6 days later. I know many people who have been very sick after the shot.

However I personally don't know anyone who was seriously sick with Covid - I know the claims that thousands died, but I don't know any.

My opinion at this point and it is only based on limited data I've seen - is that the shot has some serious initial side effects, which kills and maims some people, but most recover. It apparently does not protect you from viruses - even Covid, and long term effects are unknown. Based on that alone, I would recommend not taking it.

But there is another side as well. **We have no idea what other kind of crazy crap they have cooked up in those bioweapon labs.** I suppose it is possible they created something that will kill all who didn't get the shot. Or maybe the doomsdayers are right and come this fall the vaxxed will start dropping like flies.

I'd say more likely everyone will be fine, and they will have just created a split between vaxxed and unvaxxed. As far as I can tell, that split is almost exactly 50/50.

When anyone says it's not Gene Therapy...show them this...

https://www.youtube.com/watch?v=-_NNTVJzqtY&t=2067s

The inventor of mRNA vaccine tech literally says IT IS GENE THERAPY - clear as day.

He's also pretty alarmed about it all himself. Not specifically mRNA tech, but this vaccine and the issues with the spike proteins specifically. And specifically the findings of Dr. Byram Birdle from the University of Guelph, in Canada. There are an alarming amount of backlash against him. There is even a website that is his name dedicated to a character attack against him.

<https://byrambridle.com/> (this website was created 1 day after of his interview below.)

<https://who.is/whois/byrambridle.com>

<https://omny.fm/shows/on-point-with-alex-pierson/new-peer-reviewed-study-on-covid-19-vaccines-sugge>

truth or go home 1 hour ago

I saw the video from the guy from University of Guelph, a University I've never heard of.

The problem is that he makes claims without any kind of information as to the level of importance of those claims - yes he sounds very alarmed, but he says - "yes the spike protein goes into the ovaries and I'm very concerned about that". He says "it can pass the blood-brain barrier". And he has proof.

And I say "Ok, so what?". Did a few spike proteins pass the blood brain barrier or a lot? At what level would it cause problems? What problems would those be and when would we see them?

It's sort of an alarmist view with no more information than when Fauci says - "the virus is very dangerous". **In my mind both of them are propaganda. We need to stop screaming "this is going to happen" or "that is going to happen" and get some science and facts on the table.** And Fauci seems to have no idea what real science is.

▲ 3 ▼

in_xanadu_did_kubla_khan 2 hours ago (Edited)

@ truth or go home

I hear ya! I want to see the info he is quoting as well, which I suppose he's trying to summarize for public release. I'm sure he wants to be accurate and not throw anything out there...I can appreciate the alarm in the interview isn't helpful without the data. I know he did a FOIP from Japan based on their data there and it was revealed that the spike proteins are essentially toxic. The inventor of mRNA tech corroborates that in the Darkhorse podcast as well.

The University of Guelph is in Guelph, Ontario, Canada.

It's a very well respected university and has been on the forefront of biotech research for a long time in Canada.

<https://ovc.uoguelph.ca/pathobiology/people/faculty/Byram-W-Bridle>

I don't take him to be someone who would want to put his reputation on the line for a few clicks. Who knows though.

Now Voyager 12 minutes ago

Wipe it out?

This isn't a smallpox style virus nor a smallpox style "vaccine". It is clearly stated by all parties that the "vaccine" doesn't prevent the person from contracting and spreading the virus. So what science are you reviewing?

Maybe a citation where someone reputable says this vaccine can "wipe it out"?

▲ 4 ▼ Reply ↩

HungryPorkChop 44 minutes ago (Edited)

Notice how the narrative has changed from Chi-com should be held -- to -- anyone not taking the vaccine is a tin foil conspiracy wingnut? These are usually the same people that say "My Body My Choice" which are now frantically pushing "everyone" must accept the vaccine. Complete indoctrination!

In any event, first time in recorded history that they have quarantined the healthy in order to protect the weak, sick and elderly. Now they want to vaccinate the healthy with a questionable jab to protect the weak, sick and elderly.

▲ 1 ▼ Reply ↩

biker_trash 58 seconds ago (Edited)

1. This mRNA treatment is not a vaccine.
2. This treatment is designed to reduce the symptoms and will not eliminate the virus. Has the common cold or flu been eliminated?
3. Your personal observational sample size is statistically irrelevant and cannot be used to form any conclusions regarding the danger of this treatment.
4. Calling people conspiracy wingnuts is not a scientific argument for taking this treatment which further discredits anything you have to say.

▲ ▼ Reply ↩

GreatUncle 15 hours ago

Lol rare side effects I think now looking back I have had three adverse reactions from vaccines and never knew it.

1. Appendectomy from a swollen lymph gland.
2. A lump in the side of the neck 2 weeks after a vaccine.
3. About a year later after sufficient degenerative nervous system TM.

Good luck all you lot who took the vaccine I am really thinking you may need to learn fast how to survive.

Zelenko Covid-19 Treatment Protocol, 0420

1. Any patient with shortness of breath regardless of age is treated.
2. Any patient in the high-risk category even with just mild symptoms is treated.
3. Young, healthy and low risk patients even with symptoms are not treated (unless their circumstances change and they fall into category 1 or 2).

Out-patient treatment regimen is as follows:

1. Hydroxychloroquine 200mg twice a day for 5 days
2. Azithromycin 500mg once a day for 5 days
3. Zinc sulfate 220mg once a day for 5 days

▲ 8 ▼ Reply ↩

TheSickManOfEurope 11 hours ago

Thousands of evil men and women in the pharmaceutical industrial complex, government and fake newsmedia are going to face Nuremberg style conviction and capital punishment by the time this atrocity is over.

We **KNOW** this will **NEVER** happen. Perhaps in 30-40 years time when all individuals responsible for this have died (of old age)documents will appear and be published.

How many people have been prosecuted for the **Tuskegee Syphilis Study**? Besides a Presidential apology and a few dollars in compensation to the (few) survivors...did anyone go to jail?

The only surprising part is that it took the herd so long to get a clue.

The Vaxx-Nazis will NOT accept any evidence (scientific or otherwise) that contradicts their cult-narrative. If their **healthy** parents/friends/neighbors died two minutes after being vaccinated.....they will rationalize it....and claim "there is no evidence that the vaxx was responsible".

The best we can do is to accept that the world will be a better place without the low-IQ eaters around.

This - - - - - >>>> **I'm a doctor and I am science.**

It's pathetic how successfully the commie fucks have been able to transfer authority of The Science from consensus to Central Command. And really pathetic justifications at that .

It has reached an apex of religious devotion where people don't even question or want to review the science.. **but but he's a scientist he must be telling the truth. Science just isn't hijack able and all scientists speak the truth.. Just like Priests do.**

Science is the ultimate testament to capitalism or maybe its vice versa. Either way both take critical thinking faculties and independence of mind.

I just wonder if more could have been done. I know it's not over, it's depressing at times that they've gained so much **open** ground, the real power is slowly revealing itself.

Watching latest Brett Weinstein interview, Dark Horse, guest claimed the numbers of complications from the vaccine could be anything up to 100x the official figures. Unlikely, but emphasises that the error bar is massive. Above reporting system is voluntary, and people have been censored from knowing what to even look for, and propagandised from considering their issues could be due to the vaccine. Vaccine complication groups of fb were deleted, with 70k or 120k people in them. Such a screwed up situation. With the suppression of ivermectin etc, this is nuremberg trials level for sure.

▲ 78 ▼ 1 Reply ↩

GPW 14 hours ago

Oh, come on, we need some more guinea pigs.

They told us that this is good science, and who are we to disagree with that persuasive and powerful argument.

The really criminal thing about this is that they are subjecting children to this experiment. Adults can be as stupid as they want to be and get in line for the jab. The kids have no choice. Someday these people will pay. Can't come soon enough.

▲ 26 ▼ Reply ↩

DeadFinks 14 hours ago

Can't avoid the experiment. Just choose to remain in the control group.

▲ 24 ▼ Reply ↩

GreatUncle 14 hours ago

Ditto ... already can associate 3 adverse reactions too vaccines so adverse reaction is already higher.

The whole vaccine concept is a scam because it works on a probability of injury off a mass of people whereas individual tailored vaccine too a persons individual genetics would ensure a 100% safety record ignored for big pharma profits.

▲ 7 ▼ Reply ↩

What is The Hedge 13 hours ago *(Edited)*

These are the kind of things that are uncovered in phase 3 clinical trials. Insisting that a group of people, 20 years old and under, who are not at all at risk get the vaccine should be considered criminal during what is an emergency use authorization period.

At any other period in history people would be storming the castle. Americans need to wise up!

▲ 16 ▼ Reply ↩

Denise52559 11 hours ago

This whole thing has been a sh*t show from beginning to end no lockdowns, masks, shots, economic destruction, etc ...was necessary.

▲ 7 ▼ Reply ↩

CNONC PREMIUM 13 hours ago

I do a lot of work in a wastewater treatment plant. Due to the nature of the environment, even as a contractor, I was all but required to take the Moderna vaccine. I agreed as I have to travel overseas this year and expected it to be required, and, as I expect the feds to attempt to require it, I chose to be the guinea pig for my wife and daughter (who will never take it, after what I experienced)

I work as an industrial controls designer. The first conversation I had after getting the second injection involved a simple, common word involving industrial controls. That word, and a small range of associated concepts, vanished from my vocabulary. While I can clearly think about the concepts involved, and understand when others talk to me about them, I can not remember the words involved when I try to speak about that topic. I can not, even here, tell you what that word is, as it is impossible to bring that word (or maybe words) to mind.

As the concept involved remains fully accessible, it is not a particularly problematic issue. But it is certainly disturbing to have a word erased from one's mind. You can tell me the word, and I can use it for about 5 seconds, but it then vanishes again.

Don't take the vaccine.

We're holding an emergency meeting. One minute later. We have convened and determined that it is advisable to continue with the vaccinations. Your blood clots, Belpalsey, heart selling, deaths and other side affects are well worth the final outcome which is global dominance by the Luciferians(us).

▲ 46 ▼ Reply ↩

JoKe Biden 14 hours ago

Yep so predictable, some of the statements will read something like this.

- The FDA and CDC have confidence that the vaccine is safe and effective in preventing COVID-19.
- The FDA has determined that the available data show that the vaccine's known and potential benefits outweigh its known and potential risks in individuals 18 years of age and older.
- At this time, the available data suggest that the chance of heart inflammation occurring is very low, but the FDA and CDC will remain vigilant in continuing to investigate this risk.

About to? I've been there since the second/third "two weeks to flatten the curve"

All except the vaccine part... I still trust real vaccines... just got the shingles vax a few weeks ago... but the wuflu "vaccine" is not a vaccine.

▲ 30 ▼ Reply ↩

csc61 15 hours ago

Falsely refer to it as a vaccine ... vaguely state it's 95% effective (for something) ... then let the country build their own stories from past experiences and preconceived notions. *"They'll be tripping over themselves to get jabbed!"*

▲ 4 ▼ Reply ↩

GreatUncle 14 hours ago

If you took the shingles vax be careful, ditto flu there is such a thing as vaccine interference.

One may interfere good or bad with another one and at this point thinking all vaccines are off unless you are at risk.

Define a real vaccine? I know 2 people had the shingles shot guess what? They both got shingles.

Question now is would they or would they not have got the shingles without the shot?

▲ 11 ▼ Reply ↩

Lord Raglan 13 hours ago

I think it is supposed to be only 90% effective

▲ ▼ Reply ↩

Decatur Guy 1 hour ago

I know someone who took the shingles vax. He had a shingle outbreak while on vacation in Mexico.

The outbreak left him with permanent scarring across his face and what's called "underwater" eye.

Sure moron, yet they actually ARE. So a drug-non vaccine-that ALTERS your mRNA genetic coding, is NOT a gene therapy? You are painfully stupid you sad, useless commie failure.

▲ 2 ▼ Reply ↩

vril PRO 11 hours ago *(Edited)*

The mRNA they transport into the cells is supposedly degraded by the ribosomes that process it. There is some reason to believe that the mRNA possess an igh-8 gene which would allow it to bind to LINE-1 gene sites of DNA in cell nuclei. The furin cleavage site is emblematic of an insertion of that gene to enable the production of a reverse transcriptase enzyme that would facilitate that retroviral genetic insertion. However, that needs to be evaluated much more closely.

As I responded above, regardless of the kind of medical "therapy" it is, it's a dangerous experiment and that's much more relevant than the kind of experiment it is.

▲ ▼ Reply ↩

The Rook of Rochester 12 hours ago

Yes, it is because it has NO history behind it and is NOT FDA approved...AND...developed much too quickly...meaning that the "science" of it's effectivity is completely lacking.

Hence.....EXPERIMENTAL.

Even a new jet engine in considering experimental until it's gone through thousands of hours of testing and thousands of hours of flight testing. Has this vaccine gone through that type of rigorous testing??? NO.

▲ 3 ▼ Reply ↩

vril PRO 11 hours ago

Talk about not seeing the forest through the trees.

You're right but it's a medical experimental without absolutely grace consequences. Yet you're hung up about the kind if dangerous medical experiment it is? Talk about taking pedantry to a new level.

Yeah, makes one wonder about the possibilities:

1. They are really dumb and genuinely thinking this vax will protect the population and do no damage?
2. Big pharma is twisting arms to fully leverage the opportunity to make bank forever?
3. They know something we don't...CCP has another shot in the barrel that this vax will protect against?
4. It's one big conspiracy that every government and institution world wide is participating in to de-populate the globe for the big reset?

There are wilder theories out there, but I'm going with a combination of #1, #2, mixed in with a whole lot of corruption and desire for totalitarian control.

Cutting edge research indicates that the spike protein is a toxin that leaves the deep muscle injection site in some subjects (aka victims) and enters the bloodstream (though scientists swore blue that this would not happen) It then travels through the lymphatic system to the spleen, liver, kidneys and ovaries and can attach to platelets causing the Idiopathic Thrombocytopenia Purpura which causes clotting and bleeding especially in the brain as it crosses the blood brain barrier (thinner in male than female children/adolescents). Search Dr. Bridle of Guelph University. He has given two interviews within the last week discussing his team's findings in conjunction with research done by Japanese scientists.

I am well acquainted with an ER doctor who works at a major southern California trauma center hospital that sees over 400 ER patients a day. They say they have seen **tons of adverse reactions** to the vaccine ranging from mild to very serious. I asked about their reporting of those on the VAERS database. Neither they nor any of the other ER docs at that hospital or another major hospital where they pick up some extra shifts KNEW ANYTHING ABOUT HOW TO REPORT THE ADVERSE REACTIONS THEY HAVE SEEN. To this day they still have not been instructed on how or where to make such reports.

Can you say **MASSIVE UNDER REPORTING OF ADVERSE REACTIONS!!!!**

▲ 13 ▼ Reply ↩

LeadPipeDreams 1 hour ago

As I understand it the VAERS system UI is very difficult to work with to the point that most doctors don't even bother.

▲ 2 ▼ Reply ↩

in_xanadu_did_kubla_khan 1 hour ago

It's probably the most complicated reporting system for something that NEEDS a simplified and easy to use reporting system. But hey, at least the US has one that people can self report on.

Canada doesn't disclose anything to it's plebs - and an individual can't even make their own report...you MUST go through your healthcare practitioner, so it's their word over yours.

<https://www.canada.ca/en/public-health/services/immunization/reporting-adverse-events-following-immunization/form.html>

...but don't worry, there's no conspiracy...just take the jab and shut up...pleb.

Fluff The Cat 4 hours ago

To give this better perspective:

Back in 1976 when they claimed there was a Swine Flu pandemic, they tried to vaccinate 55 million Americans, but had to short-circuit their plans due to their vaccines paralyzing upwards of 300 people and killing 25. Yes, you read that correctly.

Fast-forward to today. Thousands, maybe tens of thousands, have died after taking these new vaccines, and far more have suffered unwanted side-effects including blood clots, paralysis, stroke, heart inflammation, etc. But they refuse to pull the plug on these vaccines because they're tethered with the technocratic communist NWO they want to impose on an unsuspecting world populace.

My daughter and I got into a really bad argument, twice, about this. She even had the wokeness to say that she could guarantee me that it's 100% safe, thoroughly tested, and that mRNA tech has been around for years.

I've been forwarding articles to her about this. I've begged her not to take it, but I don't think she'll listen. She lives on her own, so she'll be seated at the head of the banquet table of consequences, all by herself. My conscience is clean, but it tears me up as a parent.

Don't understand how she could go from being a reasonable, thinking conservative kid to woke Millennial. Guess the old saw is true: lie down with dogs, you're gonna get fleas. Her friends are real peaches.

I feel your pain. My best to you in your situation.

Rex Dickerson 13 hours ago

My son was stationed in Ukraine for the past year. He said there was pressure to get vaxxed from command. He declined and told me he'd resign his commission if forced to vax. He did contract covid but made it through ok. Now has antibodies. Unfortunately his wife idiotically got vaxxed before he returned home. My son in law also got vaxxed.

My four kids have decided against it. Thank goodness. Everyday brings more bad news about the lies behind the experimental gene therapy.

You have a 'vaccine' which is an experimental gene therapy shot being sold by a known genocidal maniac, Gates, who will never take what he's selling. Do you require more information whether or not you participate in the largest human medical experiment in the history of the world?

▲ 12 ▼ Reply ↩

sailmann 3 hours ago

THIS COMPLICATION IS REAL!

I have had a close friend who developed acute pericarditis and myocardial in January 2021 shortly after the second Pfizer vaccination, putting him in the ICU for 2 weeks. Later developed opportunistic lung infection from steroid therapy used to treat him. Both damn near killed him. He was over 65 years old and was very healthy.

The CDC has collected enough data to make this statement but the incidence is probably greater than so far reported.

He and I took the jab at the same time, we both felt someone had to test it and it might as well be us.

Conclusion: Take it if you are at high risk, but otherwise pass. Especially if you are young and healthy, you have no business taking it.

▲ 12 ▼ Reply ↩

BorraChoom 3 hours ago

Everyone involved with getting the vaccine to you has had their liability waived under the PREP Act.

This includes everyone from the government planners of the vaccine program down to the doctor, nurse or even pharmacy intern who injects you.

None can be sued in federal or state court, unless they willfully tried to harm you.

On March 17, 2020, the Secretary of the Department of Health and Human Services (HHS) published a declaration under the 2005 Public Readiness and Emergency Preparedness Act (PREP Act) to provide liability immunity for activities related to medical countermeasures against the COVID-19 pandemic.

So the first cruise ship with 100% fully vaccinated people aboard now has 2 COVID positive people on it. And the 2 were put into isolation. Gotta ask why isolate them if the vaccine works? Or why passengers were not allowed to use the buffet & had to remain seated while vaccinated staff wearing masks & gloves served them if the vaccine works. Image being a human being & literally being treated like lab rats was your idea of a vacation.

The new normal is the most absurd backwards way of life

Resist you sheep

▲ 6 ▼ Reply ↩

GregT 3 hours ago

At this point it seems they are laughing in our faces about the vax. They openly show they don't trust it because you get treated exactly the same if you had it. There's literally no upside to getting vaxed . You still have to mask up. Still put in lockdown if their fake test shows positive. And no one will even ask how does a fully vaccinated person get COVID.

▲ 4 ▼ Reply ↩

captain noob 3 hours ago

The good part is that you are going to have to take the vax every 6 months

New mutants on the way

▲ 3 ▼ Reply ↩

hugin-o-munin 3 hours ago

There's no logic to their fakery anymore.

A so called corona virus is an exosome that is created by our own cells when it fights a toxicity which could be any of a number of things - a chemical poison, a foreign microorganism, energy fields etc. It's a natural way of detoxing and is NOT contagious unless a similar toxic condition has not been detected by the cells of another person, in that case it triggers a similar detox process.

They don't even know what they're testing for so all of their science is a bunch of nonsense. If you have a solid immune system there is absolutely nothing to worry about as we tune and adjust to this new environment of different energies. Boost your immune system by taking supplements in large amounts of Vitamins D3, K2 and C plus Zinc. That should be enough but you can also help the detox process by taking some zeolites, shilajit, cilantro or similar and drink pH balancing water with some baking soda.

It's not a vaccine, if it was it wouldn't require a booster every 6 months. This is nothing but a shot, like a risky flu shot....

▲ ▼ Reply ↩

Ghost0Laz 10 hours ago

The CDC meeting topic was not side effects, it was avoiding personal and agency liability and protecting vaccine revenues.

The CDC is not your friend, if they were they'd oppose unscreened illegal immigration and summary deportation of contagious alien disease carriers.

Their primary mission is increasing patented drug revenues and new drug approval revenues.

▲ 9 ▼ Reply ↩

s0omethingfast 10 hours ago

Dr Judy Mikovitz explains that the vaccine in athletic people restricts heart function and is expected to cause a lot of problems including sudden death. You can find her extensive explanation at [brighteon.com](https://www.brighteon.com/4e0bdf1b-c0a8-4bd0-b777-ad610fabcea7) Health Ranger channel. Here's a link. There is a high school athlete in Utah who took vax then almost instantly went into a death spiral, heart problems Etc. Currently losing his vision and fighting for his life. No words.

Noktirnal 11 hours ago *(Edited)*

- 1.) The infectious part of SARS-COV2 is a spike protein with an affinity for human pulmonary ACE2 receptors
- 2.) The spike protein is also the culprit for the body's inflammatory response - the CoViD symptoms
- 3.) The antibodies (produced by the immune system) for SARS-COV2 match the spike protein
- 4.) a virus infected cell produces more virus, which means more spike protein
- 5.) vaccines use various methods of introducing genetic codes, which code for the spike protein, into cells - causing them to produce spike protein.
- 6.) the lipid portion of vaccines (that use lipids as delivery method) has been found to spread throughout the body, not remaining at the injection site, as believed. It begins collecting in the bone marrow and ovaries at >48hrs
- 7.) free (non viral) spike protein circulates in the vaccinated; shedding occurs
- 8.) anyone, vaxxed or not, can pick up shed spike proteins and get inflammatory symptoms just like CoViD
- 9.) there are several old, off-patent, safe, generic drugs which can prevent and cure CoViD - Vaccine EUA should be revoked
- 10.) the vaccine is just as bad, if not worse than SARS-COV2. The spike protein is the cause of illness.

All of this has been known for some time. Evidence is becoming overwhelming. Most of what you hear today is to get ahead of a peer-reviewed meta-analysis that will be published in the coming days.

what a shitshow.

▲ 9 ▼ 1 Reply ↩

hadriansnightmare 11 hours ago

Great Summary. I have been preaching from the beginning of the vaccine era that only very few should risk the vaccine (debatable even for the at risk) but for the ignorant who took the shot- If the spikes are being produced throughout the body in organs, etc., is there any mitigation for that? Other than some frackin Moderno drug.

▲ 3 ▼ Reply ↩

Noktirnal 11 hours ago

Same treatment as for CoViD - ivermectin, fluvoxamine, azithromycin, Vit. D3, and zinc.

the vaccine is essentially causing the same symptoms (inflammatory response to spike) as the virus

i forgot this one -

11.) the immune response to SARS-COV2 spike protein can re-activate latent viruses

An "emergency" meeting a week away. Can we go ahead and guess that they will decide that the benefits outweigh the risks? This should serve as the final piece of evidence of their complicity in this coverup.

▲ 8 ▼ Reply ↩

Almachius 6 hours ago

Yes. The benefits to the NWO of a continued "vaccine" rollout" far exceed the risk such a "rollout" poses to the Architects of the "vaccine" "rollout".

▲ ▼ Reply ↩

jeff montanye 5 hours ago

not completely clear at this point. the nwo, tptb, the elites, the deepstate, whomever it may concern just may have gotten their dicks and tits caught in a wringer that won't let go.

let's see how this plays out.

▲ ▼ Reply ↩

johngaltfla 7 hours ago

And the deep dirty secret? The CDC does not count older (40+) patients with inflammation due to vaccination as they have been categorizing the majority of those cases as "pre-existing" conditions. This is what happens when the FDA issues an EUA instead of allowing the long term testing program to finish.

If hundreds of people under age 30 suddenly start having heart attacks, this is on the bureaucrats and Big Pharma but the media will blame Trump.

▲ 8 ▼ Reply ↩

walküre 7 hours ago

Does the blame game still work when 100s of thousands of males have heart attacks?

Truck drivers, pilots, train engineers.. the risks are HUGE!

▲ 1 ▼ Reply ↩

johngaltfla 7 hours ago

It does for the Fake News. However, intelligent people who held off on becoming Guinea Pigs for Big Pharma are now looking vindicated. I worked with these companies and they asked us to come up with protocols to avoid the complete testing regimen. As the company which would have been monkey hammered by the FDA for failure to comply, we refused. It cost us a lot of money in potential work, but kept us in business and out of jail.

smacker 9 hours ago (Edited)

*"Authors, who did not respond to requests for comment, said no link has been established between the vaccines and myocarditis and that **the benefits of the vaccines outweigh the risks**"*

Am I the only one sick and tired of hearing political elites, "experts" and other on-message vaccine fanboys claim that whatever downsides arise with these vaccines, "the benefits of the vaccines outweigh the risks".

"Outweigh the risk" to who exactly? Those who get jabbed? I don't think so.

And exactly what are the "benefits"? They will probably reduce a jabbed person's risks of contracting Covid by around 50-60% (possibly) and possibly reduce the symptoms if they catch it, but anyone who gets jabbed can still transmit it to others. And then there's the "spike proteins".

It looks to me like the risks outweigh the benefits, exactly the opposite of what's claimed.

▲ 8 ▼ Reply ↩

The Black Bishop 8 hours ago

Actually the risk reduction is around 1%, not 95% and not 50-60%. That is based on the preliminary studies in 2020. But the problems with those studies were that around 3000 people developed symptoms (about equal in both groups of 20,000 people) that were never tested for Covid. They only based their 95% on a selection of the 14 first days of the study and disregarded the rest.

There is absolutely zero upside in taking this quackzine, and just purely downside.

▲ 2 ▼ Reply ↩

smackerr 7 hours ago

AstraZeneca are on record recently claiming their vaccine provides about 34% efficacy after the 1st jab and 60% after the 2nd (adverse reactions must be excluded).

Those levels can only be some sort of "manipulated average" because the level of protection will vary for every individual. Nevertheless, it's nowhere near the original claims of 90%+. Whether it's as low as 1% is debatable.

▲ 1 ▼ Reply ↩

StuffyourVAXX 8 hours ago *(Edited)*

Dionysius Crucified 11 hours ago

Millions of 18+ year olds have been vaccinated in the past month or so in response to their colleges and universities "mandating" vaccinations for next fall. This also includes faculty and staff. As far as I can tell -- and correct me if I'm wrong -- educational institutions have been leading the charge toward mandatory vaccinations, even ahead of health care facilities. No other industry has been so aggressive.

It would be glorious to see these institutions destroyed legally for their desire to be in line for the virtue signalling treats. They jumped the gun. Soon they'll be running from it.

Many have loved ones who either chose to believe or were coerced in some way, to do this. I disagree with those whom do what others have done, politicizing, labeling, with relish and glee, the potential death and/or of maiming of people who “bought in.”

Giants own father, in his last days, rolled with the strongest chemo, to “ buy” a few more days, for an incurable cancer, in a vital, that was most definitely going to kill him. Had it been my decision to make ... well, it wasn't. Dad always made his own choices, his to make. He rolled the dice and his life ended sooner, in greatest of misery. I know, because I did the hospice care on him, held him as he took last breath, then bathed and dressed him before the undertaker came.

I often wonder, and sometimes ask, how strong is your faith?

people sometimes confuse faith, real faith, as weakness ..

That would be a mistake ..

Blessings to you and yours

Legal immunity goes to the manufacturer.

It doesn't extend to the mandator.

▲ 2 ▼ 1 Reply ↩

BorraChoom 10 hours ago

Everyone involved with getting the vaccine to you has had their liability waived under the PREP Act. This includes everyone from the government planners of the vaccine program down to the doctor, nurse or even pharmacy intern who injects you.

None can be sued in federal or state court, unless they willfully tried to harm you.

On March 17, 2020, the Secretary of the Department of Health and Human Services (HHS) published a declaration under the 2005 Public Readiness and Emergency Preparedness Act (PREP Act) to provide liability immunity for activities related to medical countermeasures against the COVID-19 pandemic.

That's a terrible thing to say. You have millions of people forced to choose between their livelihoods and the job. I have multiple friends that don't have the option of working from home like I do where I'm safe from my company's demands. These people have family to feed and don't have the luxuries you might have to feed your family.

▲ 5 ▼ 3 Reply ↩

Pair Of Dimes Shift 14 hours ago

Your friends aren't too smart.

▲ 2 ▼ 1 Reply ↩

Weihan 14 hours ago

THAT IS ILLEGAL! Those friends of yours need to be better informed and join the thousands of lawsuits against companies/organizations that are requiring these jobs. If your friends are that easily intimidated, they should get a lesson in fighting for their rights.

▲ 3 ▼ Reply ↩

Arctic Frost PREMIUM 13 hours ago

Vendors don't have a choice because of Government requirements for any government onsite job. They coerce their employees to get the vaccine to make the job go easier and get the cor on site to lighten up. You guys in your cushy lives who don't have to worry about feeding your families find it easy to judge others. Well, screw you as you're no more realistic than the pampered progressives. I consider myself lucky and I advise all I can in trying to figure out ways around it and supporting them against those that tell them, just get the job. But at least I have compassion; for their situation, what these gawd damn "experts" are telling them and the fact they've been out of work for over a year waiting for these contracts to start up. But nooooooooooooo, they should listen to you, take your advise, why? Because you're just so gawd damn understanding. Look in the mirror and THAT'S why people don't listen to you!

▲ 1 ▼ Reply ↩

Arctic Frost PREMIUM 13 hours ago *(Edited)*

Here's just one example of a government requirement: the OUTDOOR bathroom has to be scrubbed from top to bottom after EVERY use. That's an OUTDOOR job! Imagine a team of 12 and a cor on-site who thinks he needs to use the friggin thing every ten minutes. It costs near a hundred bucks to scrub it down each time. SO SCREW YOU NON WORKERS! You have NO IDEA what's going on out there in your cushy little pathetic existences.

<https://www.the-scientist.com/news-opinion/the-promise-of-mrna-vaccines-68202>

*Despite its promise, there are challenges associated with working with mRNA. Ordinary mRNA produces only low levels of proteins, and the molecule degrades too quickly inside the body to make it suitable as a therapeutic. On top of that, RNA can trigger an immune response that's independent of the response to the protein it encodes. **"If you just inject foreign RNA into people or animals, you can induce a very serious inflammatory response,"** Pardi says.*

might as well inject....antifreeze.....

▲ 1 ▼ Reply ↩

squib 3 hours ago

Wow what a hoax. What a travesty. Every step. There is no 'virus', there never was or were any 'viruses', no one has ever gotten sick from a 'virus' as described. Cold and flu are not caused by a 'virus', no matter how many time the lies are repeated. Germ theory is a fraud and they've got 99.5% believing it. It perpetuates fear. It must be recognized that it is false...and people will see through the fear and not get poisoned (vacksed).

They just want you thinking, arguing and talking about where something that does not exist comes from. Old trick people never see through.

If you are arguing about whether it came from a lab or a bat's ass, you are being kept in the narrative and their false binary.

If you are still arguing if it came from a lab or from a bat's ass, either way...you're still arguing within their paradigm that there is such a thing we should be interacting with called a pandemic or 'virus'.

It's just a trick to keep people in their narrative and bickering inside the agreement that there is such a thing we should be talking about and arguing about within their false dialectic paradigm to keep the fear train rolling. It also allows the average person to rationalize getting vackseens, when 'coronavirus' has never even been isolated or shown to cause disease.

Manufactured consensus over false paradigms, that's their control mechanism. They put up the fence posts and most people stay within them.

▲ ▼ Reply ↩

snatchpounder PREMIUM 2 hours ago

Squib is saying that viruses do not exist.

▲ 1 ▼ Reply ↩

squib 2 hours ago *(Edited)*

As described. As one spends time looking into better research (not funded by CDC, WHO, Rockefeller and not found in mainstream), one may come to understand that our cells produce 'solvents' that remove toxins and therefore can be called viruses...but they do not cause disease, do not harm, do not infect and are not contagious. The only way to get viruses as described here is from needle/syringe.

▲ ▼ Reply ↩

GregT 1 hour ago *(Edited)*

I understand that. Why I asked what caused the Spanish flu. He avoided that simple question. Can't deny Spanish flu existed. So if viruses don't then that only leaves a bacteria or fungus as the cause of infection.

▲ ▼ Reply ↩

squib 2 hours ago

How did this important Fauci detail get missed so long?

[Christine Grady - Wikipedia](#)

Fauci's wife is the HEAD OF NIH and approving his genocidal tendencies. Conflict of interest, anyone?

***Christine Grady** is an American nurse and [bioethicist](#) who serves as the head of the Department of Bioethics at the [National Institutes of Health Clinical Center](#)*

▲ 7 ▼ Reply ↩

Rest Easy 6 hours ago

Um.

▲ 1 ▼ Reply ↩

jeff montanye 5 hours ago

good catch but not quite head of the entire nih, head of the department of bioethics as you write at your second link.

(from your wiki link) "Christine Grady is an American nurse and bioethicist who serves as the head of the Department of Bioethics at the National Institutes of Health Clinical Center. . . . Grady is married to Anthony Fauci, an American immunologist and head of the National Institute of Allergy and Infectious Diseases (NIAID) at the National Institutes of Health."

your point is valid: upvote.

That reminds me of an old joke

I the desert a big sign said 'Castrate Male Camels with no Pain'

A Bedouin decided that had enough with one of his camel, and it's time. He put the camel on the provided ramp, and the service provider took two bricks and smashed the camel balls. Screaming in pain the camel disappeared in the desert.

Confused the customer pointed to the the sign, which said 'without pain'

The attendant explained that the trick is not to catch your fingers between the bricks.

“Does anyone else not find it odd that after discovering 800 cases in the VAERS database the **"emergency" meeting is in 7 days?** ... and in the meantime, every public health authority figure is **encouraging parents to get their young children vaccinated?**”

Given morbidly and mortality numbers in this population...it is patently bizarre why parents are subjecting children to unnecessary risk.

That said, we can imagine a seven day notice of a meeting means they're not that concerned about this condition.

We can also imagine them citing millions inoculated...and a “mere” few hundred with this “adverse” reaction...

how is it I'm not filled with fear, and i only have access to the same exact information as any other commoner....

how is it i can see through the obvious fear tactics being used to scare people into taking the vaccine?

how is it i have not succumbed to the mainstream media's propaganda?

▲ 1 ▼ Reply ↩

GregT 23 minutes ago

Because your world view was formed from logical thought. It's all habit by now. And if a problem arose you could not answer you took time to research & find a logical answer. And if your initial answer was wrong you didn't look to blame the first scapegoat you could find & claim victim status...you moved on & thought...damn that sure was stupid of me. You owned your mistakes & learned from them.

When this isn't done people just develop a habit of emotionally reacting to problems. I'm sure people like this will be in denial...like your friend...who needed to go to the ER. He or she isn't ready to face the real possibility they reacted out of fear & took an injection of something they don't have a clue about. Honestly if I had I'd probably close my eyes & just blindly hope it works out ok. What other option do you have if you take that massive risk & it goes south on you. You can't unring a bell...you can only hope it magically goes away.

▲ ▼ Reply ↩

When is the medical society going to fess up and bring us some accurate data with **Reliability and** validity are **concepts** used to evaluate the quality of their research. They should be willing to indicate how well a method, technique or test measures something. **Reliability** is about the consistency of a measure, and validity is about the accuracy of a measure as an example. There are standard methods for this reporting, there are many Americans that aren't brain dead, it's time the medical society quit giving us Flash and run information.

At this point in time there is no reason I would believe the medical society is trustworthy they aren't brave enough to tell us the truth or they're telling us lies. There is no way the medical industry should even start a vaccination program without the truth in front of them and reasonable facts and statistics. As an engineer I know there are already programs written to follow processes with Statistics and Controls already in existence to follow the performance of these vaccines I suggest a laid on the table for everyone to read. It is evident to me we have the wrong people in control,

There's a problem with developing new bioweapons. If you have a unique bioweapon it doesn't stop adversaries from retaliating with their own still effective WMDs.

So new bioweapon development should emphasize stealth. For example a virus that mimicked the flu with flu symptoms and initially flu like results but mutated over a period of years to become deadly.

If a bioweapon like this escaped accidentally all of the hair on fire overreactions from the beginning make perfect sense.

NAV 12 hours ago (Edited)

Unfortunately, and allegedly, 99% of adverse reactions to vaccines are not reported.

This appeared on the Robert F. Kennedy, Jr.'s website Children's Health Defense 04/15/21:

18 Reasons I Won't Be Getting a COVID Vaccine

"I'm not here to pick a fight with anyone, just to walk you through some of what I've read, my lingering questions and explain why I can't make sense of these COVID vaccines."

By [Christian Elliot](#)

8. Under-reporting of adverse reactions and deaths

According to [a Harvard study](#) (commissioned by our own government), less than 1% of all adverse reactions to vaccines are actually submitted to VAERS.

While the [problems with VAERS](#) have not been fixed (as you can read about in [this letter to the CDC](#)), at the time of this writing, [VAERS reports](#) over [2,200 deaths](#) from the current COVID vaccines, as well as close to 60,000 adverse reactions.

If those numbers represent only 1% of the total adverse reactions (or .8% to 2% of what [this study](#) published recently in the JAMA found), you can do the math — but that equates to somewhere around 110,000 to 220,000 deaths from the vaccines to date, and a ridiculous number of adverse reactions.

Bet you didn't see that on the news...

▲ 6 ▼ Reply ↩

paranoid.dragon 13 hours ago

but didn't the government and media tell us ad nauseum how "safe" the vaccines are??.....

So apparently they consider myocarditis as "safe", and previously they whitewashed blood clots in the brain as "safe"

so now i'm curious to know what their threshold for "not safe" would be....

When it comes to their Holy Grail Idol vaccines, I'm not sure they would consider any side effect as unsafe, including death.

It makes it clear how truly unstable these Pro-Vaxxers are....

Basically they are willing to perform vaccine blood sacrifices, kinda like how the pagan Myans butchered countless children on top of their pyramids to please their gods....

And somehow those questioning vaccine safety out of concern for personal health are anti-science???

puh-Leeeeeeze.

these Pro-Vaxxer Vaxx-Addict Cultists are insane.

Kelley 15 hours ago *(Edited)*

The CDC needs a week to come up with a small enough fraction of the vexed population that implies these outcomes are rare. As an example, they might report there is a risk to black females between the ages of 18 and 19 who smoke and were taking the pill.

They might have a total of three people in that category which is their primary goal. They want a tiny absolute number just like before when faced with myocardialpenia.

They will warn the public about those folks while providing free donuts to everyone else who takes a shot and declare their job done.

▲ 6 ▼ Reply ↩

Cabreado 15 hours ago *(Edited)*

The CDC has been sufficiently exposed, and they're trying to save face with the masses.

Good luck finding any non-corrupt oversight to resolve this situation... that of a rogue CDC. Otherwise it would've happened a long, long time ago.

▲ 6 ▼ Reply ↩

Chevrus 3 hours ago

Yeah they have spinning this the whole time...the "hesitancy thing" millions spent on campaigning, and now the damage control which of course includes censoring and deplatforming anyone who questions the narrative. When die-offs happen, they will spin that as well. It's up to us not to let them do it.

Well..well, **the not-a-vax has killed 77 percent of the total covid-19 deaths in Iceland.**

Their "cure" is set to amass a much larger body count than the "disease". Except the Flu took the weak, not-a-vax is killing the healthy.

▲ 5 ▼ Reply ↩

GregT 1 hour ago

That's why it's vital to know the real lethality of COVID. How many died from COVID...not with COVID. How many perfectly healthy people contracted COVID & died.

▲ 2 ▼ Reply ↩

esprit 1 hour ago

I can see an out for them.

What Covid...? This was just a test...

▲ ▼ Reply ↩

GregT 1 hour ago

No out this time. They're in the world of absolute truth with this. Have any opinion you want...this is a rare black & white issue. I'm certain more have died of the vaccine in the last 5 months than the virus. It's very possibly more have died from the vax than the entire outbreak of COVID. But no where can I find the real number of deaths solely attributed to COVID. But I'm sure eventually someone will pour thru the data & publish it. Every vax death was totally unnecessary & preventable. It's a man made death. Not natural death.

38. One significant area that would benefit from interoperability of health systems and data is around testing data and vaccination records for COVID-19 and potentially other diseases. We recognise that there is a need for multilateral collaboration on a standards-based, minimum data set for COVID-19 testing and vaccination verification that can be used internationally as necessary. We should work within existing WHO processes to develop international standards and recommended practices for the creation, use, and mutual acceptance of testing results and vaccination certificates across countries. Vaccines must be safe, effective and rigorously reviewed.

▲ 1 ▼ Reply ↩

glenlloyd 1 hour ago

If we get to the point where people start dropping dead from the jab the G7 (not that they have any real authority) will have to address the problem.

As for UK...pfuck UK and it's police state, who wants to go there anyway...maybe once but not now.

▲ 1 ▼ Reply ↩

Chaos 2 hours ago

Another panel member, Dr. Jay Portnoy, director of the Division of Allergy, Asthma, & Immunology at Children's Mercy Hospitals & Clinics, asked for a comparison between the adverse events in vaccinated versus unvaccinated persons, saying if the adverse event rate was lower in those who are vaccinated, then it would still be worth getting a jab.

If it will save only one child's heart from inflammation, it is worth stopping this bullshit and admitting we were wrong, duped and greedy for money and power. FFY

Arguments from the left:

- 1) Quote the 2000% inflated death count
- 2) Say 'doctors wear masks'
- 3) Say 'the odds of severe side effects are .00001%' with absolutely no evidence besides rudimentary guesses and poor math skills.

▲ 2 ▼ Reply ↩

absalom_hicks 5 hours ago

The numerous problems which are reported are a strong indication that the scientists have missed something.

Because on paper the mRNA vaccines are almost ideal: no pollution with proteins from the substrates the virus vector is grown in, no adjuvants (PEG is the adjuvant although its main purpose is to coat the RNA), quick to design and manufacture, quick and easy to adjust to new variants, strong immune reaction including T-cells with the right profile (Th1 weighted = proinflammatory, see [this, toward the end](#)).

So what are we missing? E.g.: a Th1 (T-Helper cell, type 1) response promotes an [autoimmune response](#). This is certainly not a good thing. How about manufacturing quality? Vaccine degradation because it has to be stored at ridiculously low temperature (and may not be). Or that the mechanism by which mRNA vaccines produce a strong immune response is [not completely understood](#) (as of 2018).

And the things that "are not completely understood" are the things we know that we do not fully know. This is not what will bite us. What will bite us is that which we do not know that we should know and did not anticipate, e.g. Rumsfeld's unknown unknowns.

This is why the very high incidence of problems (compared e.g. to flu vaccines with similar rollout volume) should cause much more alarm than it does.

▲ 5 ▼ Reply ↩

walküre 5 hours ago

Efficacy is limited to only a few months, not years.

What's the point to conducting a broad experiment with not 1 BUT 2 doses across the entire population?

The money wasted on the products, the distribution, the logistics, the infrastructure..
.not even talking about potential long term consequences to health care sector.

For what?

Fundamental errors were made either on purpose or by accident.

There needs to be a much larger inquiry into the whole rollout than just going after Fauci.

Who knew what and when? Who paid who to do what and when?

▲ ▼ Reply ↩

They're giving enough time to get their stories straight and form a consensus that no one speaks on certain aspects, plus to figure an amount of public interest. A week for an emergency meeting? Means one thing: nothing will change. It's being worked out in the meantime. It'll be packed with pro vaccine demands from.. Experts. A few freakish appearing "anti vaxxers", to show that if you're of another opinion than "Fauci's Administratively Determined Science" (FADS), you're an "inn bread" cretin, and then the majority of the speakers will appear not freakish, The Educated, Concerned Vaccine proponents, making pro remarks and putting the "Crazies" - those who the Press and BidenObama Admin call uninformed - down.

Send commentary or sign up to speak for 3 minutes at the Zoom Emergency Meeting June 18th via this link, if interested:

https://www2.cdc.gov/vaccines/acip/acip_publiccomment.asp

They say too much interest and a "lottery" will be used to choose who gets to Zoom meeting speak, and offer an email option for the rest. I'm guessing it'll be "crazies", a few weird looking types, rambling incoherently or almost, to make the wary appear ludicrous, and then a slew of Educated Literate Leftists with well rehearsed statements on why the chirrens will die if they are not vaccinated before school begins next Autumn.

Theatre of the Damned.

The UN's org CDC have been up to their necks in the covid19 hoax from the start.

Its not a vaccine its **illegal medical experimentation**.

The effects(the deaths, clots, inflammation etc) from the GMO trial will not be known for some time.

It must be stopped immediately.

<https://notpublicaddress.wordpress.com/2021/05/24/the-psychomedia-and-its-long-history-of-public-mind-control/>

▲ 5 ▼ Reply ↩

Robert De Zero 12 hours ago

My biggest problem with the new experimental vaccines is that linkage to deaths, over time, won't be investigated. We all know smoking takes years or even decades to cause lung cancer. I think we all agree that it DOES cause lung cancer.

If people start dropping of strokes, heart attacks and neuro degenerative disorders after 2-5 years, no effort will be made to investigate.

From virtue-signaller to statistic in 2 years.

I'll happily play the part of black sheep outsider, as they drop.

Did they get the heart inflammation from lying in bed too long to get rid of the blood clots from the vaxxine?

▲ 5 ▼ 1 Reply ↩

Great Reset 14 hours ago

The "vaccines" are creating antibodies to your own cells - that is the reason you get the blood clots. Same thing with the heart muscle. Myocarditis is heart muscle inflammation. The "vaccines" are creating antibodies that are attacking these guys' heart muscle just like some viruses do. What happens when you have inflammation and damage? You get scar tissue. Do you really think that this doesn't have lasting effect? These guys will have problems ater in life with their hearts and it won't because of McDonalds....

The 3rd Dementia 56 minutes ago

why are people sooo sure that mainstream media owes them any truth whatever? and most folks, ill-informed and having made a bad decision, will attempt to find ways to justify it instead of owning it. they'll also find ways to be accusatory to others when suddenly finding themselves shunned (because of spike shedding).

you can still contract the infection and spread it to others. yet it is the unjabbed who are held in contempt & vilified. Senselessly, people took an experimental gene therapy shot for no good reason, and the people who refuse to do the same are NOT responsible for anyone else's rigidly-indoctrinated mindset. these people, too lazy or lacking the self-preservation mechanism to research, they'd rather just blindly obey.

hooligan2009 2 hours ago

what can you do when your own government and its agencies is intentionally seeking to cause you harm and death?

check this out from here:

<https://conservativeplaylist.com/2021/06/10/cdc-caught-cooking-the-books-on-covid-vaccines/>

" As of April 30, 2021, the CDC had received a total of 10,262 reports of [vaccine breakthrough infections](#),⁸ which it admitted was a “substantial undercount,” as they’re using a passive surveillance system that relies on voluntary reporting from state health departments.⁹ May 17, 2021, the number of breakthrough cases was slashed to 1,949, as the new guidance that only takes hospitalizations and deaths into account took effect.¹⁰

▲ 4 ▼ Reply ↩

jeff montanye 1 hour ago

having the government try to draft one for vietnam worked as an early corrective for thinking of them as one's friend. didn't work for everyone in that position though.

NAV 3 hours ago

The CDC survival rate for people who test positive for Covid-19 (a tiny fraction to begin with) is 99.997% for age 0-19.

Age 20-49: 99.98%/ Age 50-69: 99.5%/ Age 70+: 94.6%.

<https://townhall.com/tipsheet/mattvespa/2020/09/28/new-cdc-coronavirus-survival-rates-torches-the-democrats-lockdown-regime-n2576983>

TAKE HOME FACT: COVID-19 shots cause reactions in the majority of people. There is no scientific evidence that having strong reactions to a drug or biological means that the product is effective.

Government health officials have said that COVID-19 vaccines will be approved for use in children of any age by early 2022. With the majority of adults suffering very strong COVID vaccine reactions, especially younger adults, why are there plans to give the messenger RNA cell disrupter biological to infants and young children when the CDC says the majority of children with COVID-19 disease either have mild symptoms or no symptoms at all? — Barbara Loe Fisher

**YAWN, TRIALS NOW, please? ..Subject 'Depopulation efforts by the Elite'.
FAUCI/GATES/SCARF WOMAN.**

Defendants: 🐼 FAUCI/GATES/SCARF WOMAN. 🐼.

The Nuremberg Code 1947 Permissible Medical Experiments

The great weight of the evidence before us to effect that certain types of medical **experiments** on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human **experimentation** justify their views on the basis that such **experiments** yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the **experimental** subject there should be made known to him the nature, duration, and purpose of the **experiment**; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the **experiment**.
2. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the **experiment**. It is a personal duty and

responsibility which may not be delegated to another with impunity.

3. The **experiment** should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
4. The **experiment** should be so designed and based on the results of animal **experimentation** and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the **experiment**.
5. The **experiment** should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
6. No **experiment** should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those **experiments** where the **experimental** physicians also serve as subjects.
7. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the **experiment**.
8. Proper preparations should be made and adequate facilities provided to protect the **experimental** subject against even remote possibilities of injury, disability or death.
9. The **experiment** should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the **experiment** of those who conduct or engage in the **experiment**.
10. During the course of the **experiment** the human subject should be at liberty to bring the **experiment** to an end if he has reached the physical or mental state where continuation of the **experiment** seems to him to be impossible.
11. During the course of the **experiment** the scientist in charge must be prepared to terminate the **experiment** at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the **experiment** is likely to result in injury, disability, or death to the **experimental** subject.

GALT.

hardly. the cure for damaging the rule of law is more rule of law not less.

look at history.

▲ ▼ Reply ↩

Almachius 3 hours ago

rule of law is all well and good in peacetime. Now is not thus. A secret war is waged on the human race. Playing lawyer in the courts that are mainly under the rule of the lawless is a futile endeavour. Once the evidence of a conspiracy to harm humans with "vaccines" is established, then it is time to identify and liquidate those leading that agenda. And there is overwhelming evidence of such an agenda. The suppression of expert testimony on the efficacy of hydrochloroquine and ivermectin as treatment is sufficient to conclude that a conspiracy exists to push a "vaccine" on everyone. The suppression of data on "vaccine" deaths is also patently obvious. Natural Law requires that such a reality, facilitated by the usurpation of political and judicial authority by the enemy, be met with by force. Death to the scum that propagate this evil!

In the UK the Government's Yellow Card system for reporting adverse reactions dated 26th May reported the following for AZ/Moderna and Pfizer.

total deaths -1253

Adverse reactions (many serious) - 888,196

Astrazeneca had by far the most with over 695,000 adverse reactions.

Check out yellowcard.ukcolumn.org for confirmation.

▲ 4 ▼ Reply ↩

smackerr 7 hours ago *(Edited)*

And UK health boffins admit that only about 10% of adverse reactions get reported thru the system (in the US, theirs is only about 1% according to the CDC/FDA).

This rising level of adverse reactions cannot justify claims being made by the political elites and their "experts" that "**the benefits outweigh the risks**". That is complete nonsense.

It must remain a personal decision whether to take the risks and get jabbed. Those who decide not to must not be discriminated against in any way. To do otherwise is a blatant violation of the "[Nuremberg Code](#)". But when has Bluster.Boy.Boris ever attended to the Rule of Law?

CDC To Hold "Emergency Meeting" After 100s Suffer Heart Inflammation Following COVID Vaccines.

.... and of [the magnetized millions](#), they are not going to give any explanation? Traitors, sons of b****es

▲ 4 ▼ Reply ↩

paranoid.dragon 10 hours ago

The Media and Government have blatantly told us that some of the vaccinated are:

- getting blood clots in the brain ;
- having inflammation of the heart ;
- excruciating headaches(from mini aneurysms rupturing in the brain) ;
- having their skin fall off ;

To me this feels like the classic illuminati fair warning protocol.

Basically, they don't like any plan that cannot survive the light of day.

Plus they get to say "hey, we tried to warn you, but you did not listen"

▲ 4 ▼ Reply ↩

Fred box 10 hours ago

Pfizer/Moderna have a push on to get to the little children 4-6yrs old, then babies. "WTF"? Children are resilient and mostly have fully charged imine systems. Prop media's fear push is on "Mothers Fear of MIS-C" < a very small percent of children ever get Covid, then only 20% of them supposedly get MIS-C. Oh but lets rush in and fill there bodies with what amounts to be experimental vaccines<Smart like dumpTruck! Lets ruin there young hearts and give them neurological problems in stead for life, some very shortened. This Fear push is a big contributor from the corporate bought media. Hell there's no money in cures, only in treating long term disease. \$\$\$@#:(

▲ ▼ Reply ↩

paranoid.dragon 10 hours ago

the trillions of spike proteins generated by the covid vaccine will absolutely be slicing into the pineal gland.

the covid spike protein interacts with over 600 proteins in the body:

<https://thebiogrid.org/4383848/summary/severe-acute-respiratory-syndrome-coronavirus-2/s.html>

From my efforts so far i'm estimating at least 20% of those proteins are in the pineal gland.

Pharos is a good resource to look up those proteins.

<https://pharos.nih.gov/>

▲ ▼ Reply ↩

glenlloyd 11 hours ago

People would have been better off letting the body deal with this rather than trying to push an untested vaccine.

As for Berenson, he's not at all concerned about the downside consequences those who got the vaccine, he's mad at the messenger for bringing this up now. He's mad because they brought up at all and didn't try and sweep it under the rug.

Berenson is the worst kind of liberal shite, he's mad because now the public has been proven correct in their reluctance / skepticism to get an untested unknown 'vaccine' and he's mad because the concern is legitimate, and that throws a wrench into the pro vax (no choice) agenda.

▲ 4 ▼ Reply ↩

Giant Meteor 10 hours ago *(Edited)*

The public has been proven correct?

Correct me if wrong, but many in “the public” took the jab. Could not WAIT to get in line to do so, so I am thinking, “the public has been proven correct” is a fairly broad stroke here ...

I cannot speak for what is or isn't in Berenson mind, and don't much give a fuck what his politics are .. On the other hand I do agree with your first statement ..

Not a vaccine, they label it as a vaccine to have immunity to lawsuits, no pun intended. They also call it a vaccine to get emergency authorization. It's not APPROVED, only authorized, there's a difference. There's NO law mandating the vax, NONE. Your employer can be sued for discrimination or you can claim Workman's Comp if you should suffer side effects.

▲ 4 ▼ Reply ↩

What is The Hedge 14 hours ago

Considering that they counted every death as a covid death in the last 18 months, do I get to call everything from this day forward a vaccine death? Just asking for a friend.

It's not about the disease.

If it was they would NOT be blocking IVM & HCQ use for 8-10 months.

If it was they would NOT be telling people who have natural immunity to get the shot.

If it was they would NOT be misusing PCR with excessive cycle thresholds.

It's NOT about the disease.

It's all about getting everyone injected with an experimental gene therapy treatment.

It smells like Jonestown to me. I'M IN THE CONTROL GROUP.

Rest Easy 14 hours ago

I guess that can be explained, not particularly convincingly, but possibly wargamed out to them not? giving their general public a not a vaxx that would kill or maim them.

Because otherwise this gets a little complicated for me.

Keep it simple stupid.

Is our not a vaxx dangerous enough to seriously disqualify it from being administered?

If so. (And that is still a huge if for many.) Then is it due to incompetence or by design?

Then as you rightly point out. Our enemies are indeed hiding in plain sight. But invisible, thus far. For most. As are the implications.

Why are children being given this shot?

If it is dangerous. How dangerous is it?

What if any complications can be expected, if any, for those not "vaccinated" being in proximity to thousands, if not millions of relatively unknown presently, persons who have been vaccinated?

The Canadian doctor video or article making the rounds. And listed as a source on infowars as well lists several complications. Perhaps people should listen to it. I don't know.

The fact is, many people, if not personal common sense, should and has been warning about the possibilities for a lengthy amount of time.

The CDC is a private corporation supported and funded by the Pharmaceutical industry. As a corporation it is liable to have its corporate charter withdrawn. Criminal corruption is only one of the criteria. The CDC has long surpassed that criteria alone, and has been involved in what would be defined as (if private parties did it) bio-terrorism and genocidal acts, as well as multiple violations of the Nuremberg principles. Prison would be too good for these people. The CDC also announced that magically the 2020 flu didn't exist, and simply re-cast the usual chaos and deaths from flu as "covid", contributing to the terrorization of the population, most of whom are typically dumber than a box of rocks.

CDC as a private corporation data: www.truthwiki.org/cdc-centers-for-disease-control-and-prevention/

▲ 3 ▼ Reply ↩

The Media and Government have blatantly told us that some of the vaccinated are:

- getting blood clots in the brain ;
- having inflammation of the heart ;
- having excruciating headaches(from mini aneurysms rupturing in the brain) ;
- having their skin fall off ;

To me this feels like the classic illuminati fair warning protocol.

Basically, they don't like any plan that cannot survive the light of day.

Plus they get to say "hey, we tried to warn you, but you did not listen"

▲ 3 ▼ Reply ↩

"Spike protein variants in coronavirus vaccines are the root cause of blood clots, new study finds

German researchers claim to have [solved the mystery behind the blood clots](#) caused by the AstraZeneca and Johnson & Johnson coronavirus vaccines.

In a preprint article posted May 26 on *Research Square*, the team reported that the problem lies with the adenovirus vectors used by the two vaccines to deliver genetic instructions inside cells. The researchers said that due to the mechanisms involved in this type of technology, mutant versions of the spike protein are generated in the nucleus and are then secreted outside of cells. They believe that it is these mutant proteins that trigger the blood clots in healthy people who received the AstraZeneca or J&J vaccines."

de toqueville's ghost 12 hours ago

when that first nurse disappeared in Tennessee on the first day that vaccine was jabbed and the media was there taking video to show everyone how safe it was...that was a good indicator of what the real percentages are.

It take time for the spike proteins to accumulate into organs and start the deterioration. These are now toxins (Dr.Bridle, professor immunology, Guelf. Ontario) . Your body is producing billions of those and for how long ? No one knows.

Oldwood 12 hours ago

My father saw no side effects from smoking for forty years until he died of COPD and bladder cancer.

You took an untested injection never before given to ANY human for ANY reason to save yourself from a virus with a 99% chance of survival.

Now I know you think you're smart, but does that sound smart to you?

Or has your indoctrination disabled that part of your brain that allows reasoning?

Just do what the government funded experts say, and put your mask back on!

Why am I reminded of cankles being indicted for her private server, then found innocent of wrong doing? This is theatre to make people think the CDC is actually investigating when their conclusion is already decided.

Remember, the people who researched weaponizing viruses said there was no possibility it came out of the Wuhan lab. Why? Because they had their reputations and money at stake.

Similarly, the mRNA companies say that there is nothing to worry about with these shots. Why?

vic and blood PREMIUM 13 hours ago

Interestingly, Chronic Wasting Disease is a prion disease. The deer become much like zombies as their brains are destroyed.

Maybe a zombie apocalypse isn't so farfetched, after all.

▲ 3 ▼ Reply ↩

zeropopulationgrowth 13 hours ago

That started in the eighties, when Rayguns cia started shipping in cocaine for the blacks and made it crack.

▲ 1 ▼ Reply ↩

George Bayou 13 hours ago

The next 'wild conspiracy theory' that the media has carpet bombed with 'fact checking' are the people who get the RNA shots developing prion-type diseases a few years down the road.

They are comfortable with this fact-check, people will forget about it when the prions attack their brains.

I find it hard to decide if Trump was in on the plan or was too believing in those around him, such as Fauci. Being a businessman, there is little reason to expect him to have asked the proper questions without reliable aides, and he had around zero of those. He was also under constant, often unwarranted, scrutiny and attack by detractors.

That said, if it can ever be shown that he was even slightly aware of potential dangers from these hastily unveiled "vaccines", he should shoulder any appropriate amount of opprobrium. Like so many other things, I doubt we, the people, will ever come close to knowing the truth.

Regardless, I hope he never runs for office again, particularly for president. A recent article I read suggested his running for the House of Representatives and, if Republicans were to prevail, he could become the Speaker of the House. He might win such a race, but I'd rather not see him run there, either. As for the Speakership, and without looking it up, I believe that the Speaker does not necessarily have to be a member of the House. It would be worth the popcorn bill to see him put in that position by a Republican-controlled house if he wasn't even a member. Yes, fun indeed.

There is NO political solution to what is wrong with our country.

the only way to fix it is to rescind its authority and start over. The Constitution is impotent. The rule of law is dead.

We have a quality of people problem and lack of commonality of purpose. The only way to fix that is to do away with the false notion that we are all equal, that everyone deserves a vote, and that forced tolerance, diversity and equality are somehow our strength.

Just experimenting as we go along; we're all guinea pigs now.

From Wikipedia:

Myocarditis, also known as **inflammatory cardiomyopathy**, is [inflammation](#) of the [heart muscle](#). Symptoms can include [shortness of breath](#), [chest pain](#), decreased ability to exercise, and an [irregular heartbeat](#).^[1] The duration of problems can vary from hours to months. **Complications may include [heart failure](#) due to [dilated cardiomyopathy](#) or [cardiac arrest](#).**^[1]

Myocarditis is most often due to a [viral infection](#).^[1] Other causes include [bacterial infections](#), certain medications, toxins, and [autoimmune disorders](#).^{[1][2]} A diagnosis may be supported by an [electrocardiogram](#) (ECG), increased [troponin](#), [heart MRI](#), and occasionally a heart [biopsy](#).^{[1][2]} An [ultrasound of the heart](#) is important to rule out other potential causes such as [heart valve problems](#).^[2]

Treatment depends on both the severity and the cause.^{[1][2]} Medications such as [ACE inhibitors](#), [beta blockers](#), and [diuretics](#) are often used.^{[1][2]} A period of no exercise is typically recommended during recovery.^{[1][2]} [Corticosteroids](#) or [intravenous immunoglobulin](#) (IVIG) may be useful in certain cases.^{[1][2]} **In severe cases an [implantable cardiac defibrillator](#) or [heart transplant](#) may be recommended.**^{[1][2]}

In 2013, about 1.5 million cases of acute myocarditis occurred.^[6] While people of all ages are affected, the young are most often affected.^[7] It is slightly more common in males than females.^[1] Most cases are mild.^[2] **In 2015 [cardiomyopathy](#), including myocarditis, resulted in 354,000 deaths up from 294,000 in 1990...**
